1900 PARK'S FLORAL GUIDE

*The early birds, the willow's gold,
The swollen, snow-clad streams,
Foretell the slack of Winter's hold,
And Spring's awaking dreams.*

GEORGE W. PARK,
Seedsman and Florist,
Libonia, Franklin Co., Pa.

More Than Half a Million

Of flower-loving people are made happier every year by using Park's Seeds, Bulbs and Plants. This enormous and growing patronage has been secured

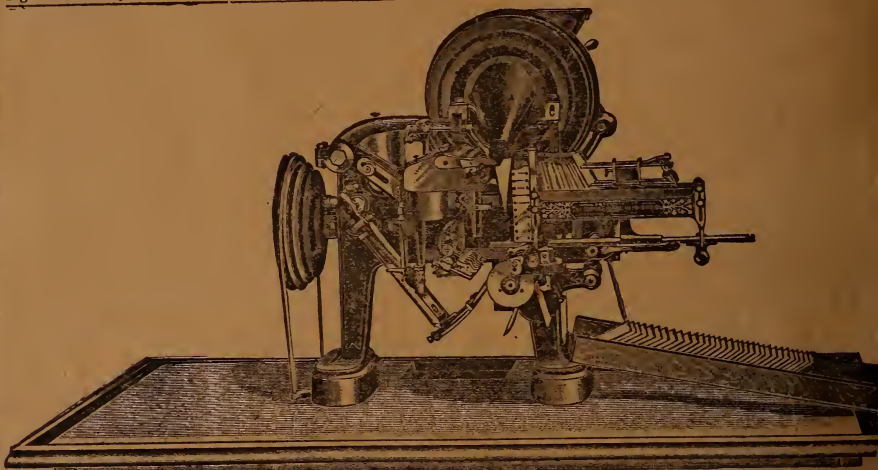

1st. By Supplying Only the Best.—A seed is worthless unless it grows. But it is worse than worthless if it grows, and by its inferior product is a source of annoyance and disappointment. The same is true of Bulbs and Plants. To get only the best contracts are made with growers and specialists in their line, who understand their business, and who are located in those parts of the world where the various flowers grow to perfection. You thus get fresh, pure and reliable seeds, and not the surplus, deteriorating stock of some wholesale house.

2nd. By Quoting Low Prices.—Prices are not lowered at the expense of the quality of the stock. But to supply the *best* at the *lowest* prices has been a study. The enormous trade done enables the proprietor to get special prices on stock, not only on seeds, bulbs and plants which may be purchased, but on nearly everything pertaining to the trade. Seed-bags are contracted for by the million, freight by the car-load, and system is introduced in every department to facilitate the business and conduct it economically. The benefits secured are turned over to the patron in lower prices. In some choice seeds the margin of profit is hardly in sight, but the great number of sales thus secured makes it a matter of consequence in the end.

3rd. By Selling Special Mixtures.—When the amateur buys a packet of seeds of mixed colors, he wants all the colors represented; he does not want the white or scarlet or blue or any color to predominate, but a fair proportion of all the known colors or varieties. This proportion cannot be secured in the ordinary foreign mixtures. It can only be had by mixing the different colors or varieties obtained separately. The special mixtures offered in this GUIDE have become very popular from practical use, as they are prepared under Mr. Park's personal supervision. This matter, neglected by most seedsmen, he gives very careful attention to, and his efforts are repaid in the very great satisfaction his mixtures have given.

4th. By Bringing the Establishment to Your Door.—The prices in this GUIDE cover all expenses. Simply make out and mail your order with the required amount, and the goods will be promptly forwarded by mail or express free of all further cost. If mistakes are made in filling your order they will be gladly corrected. If the goods should be damaged or lost in transit a duplicate package will be sent. You are released of all risk, either in forwarding money or in forwarding goods. The establishment is thus brought to your door.

All These Points Secure Entire Satisfaction.—Reader, the above are not loose, wordy statements. They are facts. Your patronage is solicited, and a trial will convince you that this is the place to buy your Seeds, Bulbs and Plants. By untiring industry, strict integrity, liberal treatment and personal regard and feeling for the interest and welfare of his patrons Mr. Park has gained the confidence and friendship of the hundreds of thousands who favor him with their patronage. And by continuing the same policy he hopes to add many new names to his list the present year. Reader, will you come in and be one of our big floral family?

STEAM-POWER SEED-PACKING MACHINE.

Here is an illustration of one of the seed-packing machines used in Park's Seed Establishment. It is the invention of an ingenious Yankee schoolmaster, and is marvelous in its operation. All that is needed is to put the seeds into the hopper at the rear and the seed-bags into the long trough at the front, and throw on the power. The machine does the rest, measuring the seeds for each packet, depositing them in the little seed-bag, turning the lappel and sealing it, and depositing it in a basket all ready for mailing. It also counts the packets. Though reliable it is very complicated, and its parts work automatically, as though possessed of life. It is destined to work a revolution in the prices of seeds, as it enables the seedsmen to do an immense business with little trouble or expense in packing. Our machines turn out 60,000 seed packets per day. Call and see them at work.

SPECIAL OFFER—25 CENTS' WORTH OF SEEDS FREE.

Do You Love Flowers? If so, you will be delighted with PARK'S FLORAL MAGAZINE. It is a handsome monthly, freely illustrated, and full of practical hints for the amateur florist. Floriculture, botany and kindred subjects are intelligently treated and questions are answered, exchanges offered, and special floral hints given in every number. Circulation over 350,000 every month. Subscription price only 25 cents a year, and as a premium you may select seeds from this GUIDE to the amount of 25 cents. Subscribe now, and ask your friends to subscribe.

HOW TO REMIT.—Send money by Money Order, Express Order, Draft or Registered Letter. Send under \$1.00 send in postage stamps. International Money Orders should be drawn on Chambersburg P. O., Pa. I guarantee money to reach me when sent as advised. If lost, the loss is mine. Always address your letter plainly, giving name, post-office, county, and State, and before sealing see that the remittance is sufficient to cover the purchase. Address

GEO. W. PARK, LIBONIA, FRANKLIN CO., PA.

TO MY PATRONS.

THE pleasure of greeting you through my illustrated annual FLORAL GUIDE is mine once more. It is almost like calling at the cozy homes of the hundreds of thousands of my flower-loving friends and patrons and extending the hand of friendship, to thus greet you. Many, very many of you have come to me for years, a score of years, for your supply of seeds, bulbs and plants, and often with your floral troubles, and the social and friendly intercourse thus promoted has awakened feelings of regard and sympathy and sincere friendship. How well I have served you in these years I leave for you to say. If any have not been satisfied, it was not for want of my personal interest, and earnest efforts. I am never satisfied until you are, for my pleased patrons are my best advertisements, and it is largely due to their kind words and friendly interest that my business has grown to such immense proportions as I find it to-day.

My Friends, for more than a quarter of a century I have diligently pursued my vocation of supplying first-class seeds, bulbs, plants and floral information to the flower-loving public, and I have to-day names upon my books that have become like household words to me by reason of our long and pleasant association. I aim to always merit the friendship of my patrons, and few, perhaps, are aware of how much I appreciate their annual letters, with the kind expressions of good-will and encouragement they contain. I am never too busy to hear a friendly word or a happy report, nor am I too busy to listen to a complaint or floral grievance. I rejoice with you in your successes, and sympathize with you in your failures. I crave your confidence, therefore, and assure you always of my best attention and interest.

My Friends, the seeds I offer are low in price, but this does not indicate inferior quality. It simply indicates light expenses, superior facilities and short profits. The seeds are the best that can be obtained, regardless of cost, and I challenge comparison. I aim to fill all orders carefully and promptly. I cheerfully correct any mistakes that may occur; I bear the risk of remitting; I guarantee the safe arrival of the things ordered; I fully pre-pay postage. My establishment is thus brought directly to your door.

Besides supplying seeds, bulbs and plants to those who love and cultivate flowers I publish PARK'S FLORAL MAGAZINE devoted to floriculture, which is a treasury of information on just such topics as are of interest to amateur florists. It is the pioneer floral journal of America, and the most popular, having a circulation each month of over 350,000 copies. Only 25 cents a year, and each subscriber may select 25 cents worth from this GUIDE as a premium.

Let me urge you to send your orders in early. Some of you doubtless have friends whose orders you wish to secure. See them at once, and make up your club promptly—the sooner the better. I hope to greatly enlarge my list of patrons this season, and assure you that any kindness shown me in the way of assistance will be appreciated and rewarded. Send for more copies of the GUIDE and MAGAZINE, with booklets, blank lists, etc., all of which will be gladly sent you, with full terms.

Anticipating the pleasure of your annual orders and friendly letters I remain,

SEASON OF 1900.

Florally yours,

GEO. W. PARK.

A FEW WORDS FROM MY PATRONS.

Mr. Park:—I think I have had more success from seeds purchased of you, than of any person that I have ever bought seeds of. I believe that every seed last year, got of you, grew, and was true to name.—E. L. Comiskey, Ind.

Mr. Park:—I find your seeds all that you claim for them.—W. F., Grafton Co., N. H.

Mr. Park:—I have always found your seeds and bulbs perfectly reliable, since the first little package I sent for, about fourteen years ago, and every one who has patronized you in this neighborhood has always been pleased. I like the MAGAZINE the best of any of its kind that I receive. I get so many good points from it. I always want to be a subscriber while I try to cultivate flowers.—Mrs. L. R. McC., Greenup, Ky.

Mr. Park:—I have dealt with you almost from the beginning of your career as seedsman and florist—more than twenty years, and always found you true and reliable; a generous friend and christian gentleman. I am not talking to our Editor here, but to our floral friends; and—but I will say no more this time.—M. S. M., Blair Co., Pa.

PARK'S CHOICE Machine-packed Flower Seeds.

ALWAYS FIRST QUALITY.

New Crop Offering for 1900. Warranted.

SOME NEW THINGS.

New Excelsior Ever-blooming Stock.

Choice Machine-packed Seeds, 4 packets 10 cents, 1 packet 3 cents.

The Ten Weeks' Stock is an annual of great beauty, and deserves a prominent place in every flower garden. The only objection to it has been its late-blooming character, some of the plants failing to show flowers the first season, unless started early. In the New Excelsior Stock, however, this trouble is entirely overcome, for it begins to bloom early, while the plants are small, and continues throughout the season, until after frosts, the rich-colored, highly perfumed flowers being produced in long, upright spikes. Thus far no variety of Ten Weeks' Stock surpasses or equals the New Excelsior. It is one of the loveliest and sweetest of garden flowers, showy, and easily grown from seeds. It is one of the finest annuals grown and should stand near the head of your list when you write out your order. 4 packets 10 cents, one packet 3 cents.

Sow seeds of Ten Week's Stock in a window-box or hot-bed early, or in the open ground when danger from frost is past. Thin the plants if they begin to crowd each other, as they should not become drawn or slender before transplanting. Select a cloudy day for transplanting, press the soil firmly around each plant and water well, then shade.

New Chameleon Nasturtium.

4 packets 10 cents, 1 packet 3 cents.

Here is a new French Nasturtium, of vigorous, climbing habit, which is exceedingly free-blooming, and the flowers are of many colors, some light yellow, some orange, some bright crimson, and some spotted and blotched, all upon the same vine. Anyone can grow this superb climbing annual, and the flowers are produced constantly from early till late in the season. It is one of the first-class new things, and will be sure to please those who try it. It is not troubled by insects, and the bright, clean foliage and lovely display of many-colored flowers always elicit great admiration. Mulch the soil with stable litter as warm weather approaches. Per packet 3 cents, 4 packets 10 cents.

New Gloxinia-flowered Pentstemons.

4 packets 10 cents, 1 packet 3 cents.

The hybridist has by skillful manipulation with the large-flowered Pentstemons secured a race of varieties with immense flowers, rich and varied in color, attractive in form, and freely borne on long, erect stems. They are known as Gloxinia-flowered Pentstemons, because of the form and great size of the flowers. The plants start readily from seeds, grow thriftily and begin to bloom in summer and early autumn, continuing till late in the season. They are hardy and will bloom well for several years, under ordinary conditions, if not exhausted blooming. In a severe climate, however, a slight protection, as a board frame with lath placed about the bed in December will prove beneficial. I can supply the seeds in

Dark Red and Scarlet shades, mixed, per packet.....	5
White and light colored mixed, per packet.....	5
Blue and Violet shades, mixed, per packet.....	5
Complete mixture, all colors and shades, machine-packed,	
4 packets 10 cents, per packet.....	3

New Hybrids of Primula Obconica.

Large-flowered, Splendid Mixture, all shades, 4 packets 10 cts., one packet 3 cts.

When Primula Obconica was introduced from China some years ago the flowers were small, plain, borne in small clusters, and of only one color—a sort of lavender-white. To-day the improvement noticed is wonderful. The plants are more robust, the flowers more than twice as large, with both plain and fringed petals, of many handsome shades, and produced in fine clusters. As winter-bloomers they almost surpass even the Chinese Primrose. Seeds sown in the spring will make fine blooming plants by autumn, and then will bloom in great profusion throughout the entire winter and spring. No plant will thrive with less care, and propagation is easy from seeds. It is one of the half dozen plants that are indispensable in the amateur's window.

“ “ rose.....	6
“ “ Hybrids in splendid mixture, 4 pkts. 10 cents,	
one packet.....	3

Mr. Park:—One of the most satisfactory plants I have is Primula obconica. The plant itself is of neat and compact growth, and the blossoms are beautiful, profusely borne and enduring.—A. W., Washington Co., Vt.

The Baby Primrose.

Price, 4 packets 10 cts., 1 packet 3 cts.

Primula Forbesi, commonly called The Baby Primrose, is one of the most delicate, chaste and lovely of the new flowers of merit suited for the window garden. It blooms freely and continuously, throwing up numerous clusters of its charming lilac flowers, as shown in the illustration. Seeds germinate readily, and the plants develop rapidly and soon begin to bloom. Started in May the plants make charming pots of bloom by autumn or winter. As the plants stool out they are readily increased by division, as well as by seeds. The demand for this exquisite Primula the past two years has been such that the plants have commanded a high price. This will hardly continue now, as it is known that any amateur can successfully raise them from seeds, and under favorable conditions the seedling plants will begin to bloom in four months from the time the seeds are sown. Price, four packets 10 cts., one packet 3 cents.

New Globular Giant Fringed Primroses.

Complete special mixture, 4 packets 10 cents, 1 packet 3 cents.

I take pleasure in offering my patrons this season a new strain of the Chinese Primrose, compact and globular in habit, and yielding huge clusters of large, fringed flowers of the most charming colors. I feel that the beauty of this magnificent new strain will prove a revelation to those who have grown only the old-fashioned sorts. I can supply seeds in all the leading colors, as red, white, crimson, striped, scarlet and flesh color, copper, etc., the separate colors at 5 cents per packet, and the complete mixture, carefully proportioned, at 4 packets 10 cents, 1 packet 3 cents.

I need hardly state here that the Chinese Primrose is really the most desirable of all plants for winter-blooming. Almost every amateur florist knows this. The plants thrive and bloom where most window plants will die. Spring seedlings begin to bloom in early winter, and continue blooming till the next summer. The seeds require three weeks for germination. Keep the soil moist, but not wet, otherwise the seeds will rot or the plants damp off.

Primula Elatior.

4 pkts. 10 cts., 1 pkt. 3 cts.

The new, rich-colored sorts of the hardy Primula Elatior are of surpassing beauty, the flowers being of large size, produced in big clusters at the summit of strong stems, and exhibiting shades of white, yellow, red, brown, blue, scarlet and gold-laced, some duplex in form, but mostly single. The plants are perfectly hardy in the garden, and bloom in the spring, but may be satisfactorily grown in pots, in which case they bloom during winter. The mixture I offer is specially prepared, and contains all the new and lovely shades, as well as double and single in fine proportion.

New Large-flowered

Primula Sieboldii.

4 packets 10 cts., 1 packet 3 cts.

A very beautiful, early and free-blooming Primrose, the flowers being of a brilliant carmine with white eye. It starts readily from seeds, and is easily grown. A place sheltered from cutting winds and slightly shaded from the hot sun suits it, the soil being rich, moist and well drained. This is a Primrose not well known, but deserving of general cultivation. I hope everyone of my patrons will try it. It is a greatly improved form of the old Primula cortusoides, a species much admired. 4 pkts. 10 cts. 1 pkt. 3 cts,

New Primula Floribunda.

Price, 4 pkts. 10 cts., 1 pkt. 3 cts.

Very easily grown from seeds, and recommended as a fine winter-bloomer, it is strange that this floriferous and lovely yellow-flowered Primrose is not better known. The little engraving shows the habit of the plant, and indicates how well it deserves its name—floribunda, or many-flowered. Those who love Primroses should not fail to get this rare and lovely sort. The flowers are small, in clusters, delicate and pleasing in texture and exquisite yellow in color. Can you imagine anything more chaste and beautiful than a potful of this Primrose in the window, or a border of its sweet flowers along the garden walk in early spring?

New Everblooming Clove Pink.

Price, mixed colors, 4 packets 10 cents, 1 packet 3 cents.

The Old-fashioned Clove Pink found in old gardens, has but one fault, and that is that it only blooms for a few weeks—during summer. That fault is overcome in the new ever-blooming sort here offered, which is almost a perfect garden flower, easily grown, tenacious, has no enemies, is hardy and will live for years with but little attention, begins to bloom early in the season and bears its lovely flowers until late autumn, no seeds being allowed to form. The flowers are borne in great abundance, are large, graceful in form, single, semi-double and double, of many rich shades, and as deliciously scented as the finest Carnation. Readily grown from seeds. This is a superb perennial flower, and a novelty of very superior merit. Don't fail to put it on your list. It will prove one of the most beautiful and fragrant of your hardy garden flowers, affording a rich annual display of bloom.

New Hybrid Oriental Poppies.

Price, 4 packets 10 cts., 1 packet 3 cts.

The most gorgeous of all garden flowers are the Oriental Poppies, and a bed or border of them once established will take care of itself and bloom every summer for many years. The plants grow two feet high, with masses of beautiful radical leaves and enormous blooms borne on long, strong stems, the new hybrids here offered, showing all the lovely shades from pure white to deep scarlet and crimson. A blooming clump of these magnificent flowers on the lawn is a source of wonder as well as enthusiastic admiration, and the ease with which the plants may be raised from seeds makes it possible for everyone to possess such a clump. The seedlings will not bloom the first season, but the grandeur of the flowers and the lasting qualities of the plants will more than compensate for the delay in blooming. If you have but half a dozen perennial plants in your garden, these Hybrid Oriental Poppies should have a place there.

New Golden Matricaria.

Price, 4 pkts. 10 cts., 1 pkt. 3 cts.

A glowing novelty is the new Golden Dwarf Matricaria, which becomes a mass of rich golden-yellow flowers, extremely gorgeous and beautiful. Seeds start quickly, and the plants may be set six inches apart as an edging to a bed of taller plants, or may be grown in pots. The habit of the plant is indicated in the engraving, but its beauty can hardly be imagined. The flowers are double, globular, borne well above the foliage, and appear almost as balls of gold. From this fact the name Golden Ball Feverfew is sometimes applied to the plant. Price, 4 packets 10 cents, 1 packet 3 cents.

New Giant Fragrant Snapdragons.

Choice Machine-packed Seeds, 4 packets 10 cents, 1 packet 3 cents.

Still greater improvements have been made in the size and beauty of the old-fashioned Snapdragon, and I have the pleasure this year of offering a new strain of large-flowered fragrant varieties of undoubted merit. The flowers are not only large and sweet, but produced in immense spikes and exhibit a wonderful range of rich colors and tints, and some distinctly and exquisitely striped and spotted. I can supply the following fine colors separately:

White.....	5	Deep crimson.....	5
Scarlet, golden and white.	5	Yellow.....	5
Deep scarlet.....	5	Yellow and orange.....	5
Carmine, white throat.....	5	Yellow striped red.....	5
Bright scarlet.....	5	White and red.....	5
All varieties, special mixture, three colors well proportioned, 4 packets 10cts. one packet 3 cts.			

These Snapdragons are of great beauty in the summer garden, and if strong young plants are potted in August they will bloom well during winter, in the room window. If not allowed to exhaust themselves during the first season they will endure the winter and bloom freely the second season. Plants are easily raised from seeds, and will grow and bloom in almost any rich, sunny bed. Spring seedlings begin to bloom by mid-summer, and if the flowers are cut freely the flowering will be continuous till after severe frosts. If you wish the plants to endure the winter cut them well back in September, to induce strong, hardy growth.

New Giant Emperor Salpiglossis.

4 pkts. 10 cts., 1 pkt. 3 cts.

Here is one of the most beautiful of annuals, as large and showy as a Petunia, but much more delicate, graceful and beautiful. It is an improved Salpiglossis, bearing very large trumpet-like flowers, the rich purple, bronze and violet colors distinctly and artistically penciled with gold in the most striking manner, as indicated in the engraving. The plants grow two to three feet high, and bear their lovely flowers throughout the summer and autumn. Sow the seeds in a box or seed-bed and set the plants eight or ten inches apart, in a deep, rich soil and partially shaded place, or mulch the soil with fine stable litter if fully exposed. Do not omit this superb annual from your list. It is one of the most pleasing we have. Price, 4 pkts. 10 cts., one pkt. 3 cts.

The New Giant Browallia.

Price, 4 pkts. 10 cts., 1 pkt. 3 cts.

During my European trip one of the most attractive new flowers I saw was the new Giant Browallia at the gardens of Vilmorin in France. Here an entire greenhouse was filled with the plants, all in full bloom, showy and beautiful. The plant is rather trailing in habit, grows and blooms freely, and is considered a first-class winter blooming pot plant for the window garden, blooming almost uninterruptedly under very ordinary treatment. The flowers are twice as large as those of Browallia elata grandiflora, and are of a very pleasing blue color. A plant in full bloom in a window cannot fail to elicit the admiration and praise of all who see it. The seeds require about the same care as those of the Chinese Primrose. Avoid watering too freely, and keep the soil loose, as the young plants are tender and liable to damp off. Price, 4 pkts. 10 cents, 1 pkt. 3 cents.

BLOOMING FIRST SEASON.

Under this head I describe and price the best of the flowers, annual, biennial and perennial, which bloom well the first season from seeds. Only the finest strains are offered, and those who buy of me can depend upon getting not only the newer and better kinds, but fresh seeds of superior quality. When you make out your order kindly get your flower-loving neighbors to club with you. The seeds will be sent separately or together, as you may desire.

SPECIAL.—Persons sending 25 cents will get Park's Floral Magazine, a beautiful floral monthly one year, and may select seeds to the amount of 25 cents from this Guide. The Magazine is alone worth the 25 cents, and the seeds are thus absolutely free.

Acacia Lophantha.

Price, 4 pkts. 10 cts., 1 pkt. 3 cts.

This is one of the most graceful and beautiful of ornamental plants, and makes a grand specimen in a few months. It is easily grown from seeds, which, to germinate readily, should be filed or scalded and soaked before sowing. It is fine for a slightly shaded corner about the yard, where a fern-like bed is wanted, and also makes a lovely window pot plant. To grow well in a pot shift it as fast as the roots fill the pot, and never let it suffer for water. Nip out the central shoot to induce a bushy growth.

Mr. Park.—I wish to tell you of my Acacia Tree. It is 2½ years old, 3 feet high, and is just the loveliest thing I ever saw. It is admired by all, and the first one in the neighborhood.—Mrs. C. D. Allen, Bradford Co., Pa. March 13, 1899.

New Basket Sweet Alyssum

Alyssum compactum procumbens, 4 pkts. 10 cts. 1 pkt. 3 cts.

A very beautiful free-blooming little trailing plant is this New Sweet Alyssum, and for an edging in the garden or basket in the window it is excellent. It blooms from early summer till late in autumn, and the exquisite clusters of white bloom are fine for bouquets as well as showy in the garden. Sweet Alyssum plants begin to bloom in a few weeks after the seeds are sown, and as they revel in the cool autumn weather the plants are among the earliest as well as the latest of our garden annuals. Per pkt. 3 cts., 4 pkts. 10 cts. I can also supply the Little Gem Sweet Alyssum and the common sort at same price. Per oz. 30 cts.

Choice Antirrhinum Majus.

Price, 4 pkts. 10 cts., 1 pkt. 3 cts.

Beautiful plants for garden, mostly biennials, but blooming the first season. They are useful for beds and edgings, and also desirable for pots in the window. I have all the leading varieties, and my mixtures are specially prepared, and will give good satisfaction.

Tall varieties, separate, per pkt. 5 Dwarf varieties, mixed, 4 pkts. 10 c., pkt. 3
Tall varieties, mixed, 4 pkts. 10 cts. pkt. 3
Dwarf varieties, separate, per pkt. 5 Calceolaria-flowered, very fine, separate 5
Calceolaria-flowered, mixed, 4 pkts. 10 cts 3

[NOTE.—The new Calceolaria flowered Snapdragons are of superior beauty, and highly recommended.]

Ageratum. An ever-blooming or edging plant of great beauty. The dwarf varieties are of low-growing, compact habit, and fine for margins of beds, as they bloom profusely throughout the season, appearing as masses of blue or white. The taller sorts look well among shrubbery, or in the background. The plants like a sunny situation. Conspectum, white long-blooming, fine for cutting. 3
Lasseauxii, rose. 3
Little Dorrit, blue 3
Little Dorrit, white 3
Swanley Blue. 3

Grasshoff's Perfection Aster.

Machine packed, special mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

GRASSHOFF'S PERFECTION ASTER.

curled and twisted like those of a Japanese Chrysanthemum.

Pure white, rose, violet, blue, lilac, azure, rosy white, etc., 5c. each; mixed, 4 pkts. 10c. 1 pkt. 3

The French Paeony-flowered Perfection Asters have been among the most beautiful of all the varieties, but the race as improved by a German florist is still more attractive, the plants being of compact, floriferous habit, and the flowers almost faultless in shape, brilliant in color, and large and very double, as shown in the engraving. A bed of this Aster makes a gorgeous display. The plants are also desirable for pots. The seeds I offer are direct from the florist who improved the Aster, and can be depended upon for the finest plants and flowers.

Superb Varieties of Victoria Prize Aster.

The first and best of the German Asters is the race known as Victoria Prize. The plants grow 18 inches tall, are neat in habit, very floriferous, and in bloom are gorgeous. The flowers are of great size, regular in form, the petals finely imbricated, and showing a range of colors and tints really wonderful. Fine for either pots or beds. Sow in a box or seed-bed and set plant ten inches apart. The seeds I offer of this variety cannot be surpassed, having been saved from selected plants grown from the finest improved stock. I can supply the following varieties separately. Special mixture of all these sorts, 4 pkts. 10 cts., 1 pkt. 3 cts.

Splendid mixture of above sorts,			
4 pkts. 10 cts., 1 pkt. 3 cts.			

Superb New Japanese Aster.

9

Splendid mixture, 4 packets 10 cents, 1 packet 3 cents.

When in France I was shown a field of Asters made up of large beds of the leading varieties. The plants were in full bloom, and the scene was gorgeous. One of the most attractive of the beds, however, was that containing the new Japanese variety. The plants were about 15 inches tall, branching, and bearing immense flowers in the finest colors, the petals long, curved and twisted in the most curious manner. I can supply choice seeds this year of this sort, grown in France and imported.

Dwarf Chrysanthemum-flowered Aster.

Price, mixed colors, 4 pkts. 10 cts., 1 pkt. 3 cts.

This is the latest of Asters, and a variety of merit. The plants grow ten inches high, bloom abundantly, and should stand eight inches apart. The flowers are large, very double, well formed and show a marvellous variety of colors, shades and variegations. Few Asters give better satisfaction than this superb variety.

NEW JAPANESE ASTER.

Choice Double Asters in Variety.

I can also supply first-class mixtures of the following splendid Asters:

<i>Washington Aster</i> , height eighteen inches, flowers of great size and all the finest colors. Eight leading colors, each 5 cents; special mixture, 4 packets 10 cents, per packet.....	3

Complete mixture of all varieties, put up by our steam-power packers, 4 packets for 10 cents, 1 packet..... 3

Prize Camellia-Flowered Balsams.

Finest mixture, 4 packets 10 cents, 1 packet 3 cents.

Decidedly the finest of the garden Balsams is the Improved Prize Camellia-flowered. The plants grow eighteen inches tall, branching in tree-form, and every branch appears as a wreath of very large, full-double flowers, waxy in texture, and displaying the most exquisite colors and tints imaginable. The engraving does not exaggerate the beauty of a plant of this improved Balsam. Easily grown from seeds. Set plants a foot apart. The seeds I offer were saved by a German florist who has given this flower special care, and I offer them with entire confidence as to their vitality and quality. My mixture is carefully prepared from the following fine varieties, which I can supply separately if desired:

Pure white.....	5
Brilliant salmon rose.....	5
Pure scarlet.....	5
Scarlet, spotted.....	5
Light yellow.....	5
Lilac.....	5
Complete special mixture, 4 packets 10 cents, per packet.....	3

Improved Rose-flowered, large, double flowers; 13 splendid colors separate or mixed, per packet..... 5

Carnation Striped, beautiful double flowers, finely striped, six colors, separate or mixed, per packet..... 5

Solferino, double striped and spotted flowers; six fine sorts, separate or mixed..... 5

Atrosanguineum, rich blood red, very double..... 5

Dwarf, spotted, finest mixture..... 5

Double Spotted, flowers distinctly spotted with white, very double; 12 colors, separate or mixed, per packet..... 5

The King, scarlet and The Queen, fine satiny rose, each..... 5

Dwarf Camellia-flowered, very handsome, fine mixed..... 5

Balsam, all varieties in splendid mixture, containing all the above sorts carefully proportioned, packed by our steam-power packing machines, four packets for 10 cents, per packet..... 3

Bartonia aurea, a lovely yellow-flowered annual..... 3

Biden atrosanguinea, so-called Black Dahlia..... 3

Browallia elata, blue, white, etc., mixed..... 3

[NOTE.—Browallias are easily grown from seeds, and are superb winter-blooming plants for house culture.]

Borecole, Ornamental, foliage showy in winter..... 5

Brachycome iberidifolia, Swan River Daisy, m'd..... 5

Cacalia, Flora's Paint Brush, yellow and red, m'd..... 3

Calandrinia, a succulent annual, with showy rose and white flowers, separate or mixed..... 3

New Gladiolus-flowered Cannas.

3 packets 25 cents, 1 packet 10 cents.

The most gorgeous of all bedding plants are the new Gladiolus-flowered Cannas. The foliage is massive and of tropical appearance, and above it on branching stems are the great clusters of brilliant bloom, gaudy throughout the season. The plants are easily grown from seeds, and if started early will begin to bloom in mid-summer. The roots may be kept over and bedded out from year to year. File the seeds or scald and soak them before sowing, to hasten germination. The seeds I offer were saved by Mr. Crozy, the originator of this new race of Cannas, and includes all the new and choice varieties. The plants like a deep, rich, moist soil and a sunny situation. Set them a foot apart in the bed. Keep over winter as you would Dahlias. Price, 3 packets 25 cents, 1 packet 10 cents.

Dear Mr. Park:—I have the finest borders of Geraniums and Cannas and several other house plants! The Cannas I raised from seeds of the Madame Crozy sorts. Most of them are 4 feet tall and commencing to bloom now Underwood, Iowa, July 25, 1899.

Mrs. H. P. Hansen.

Showy and Beautiful Varieties of Celosia.

Complete mixture, all kinds, 4 packets 10 cents, 1 packet 3 cents.

The Coxcomb-flowered Celosias are exceedingly attractive plants, when grown from first-class seeds, and are fine for either pots or beds. I offer seeds saved only from selected plants, and such as will produce the finest and largest combs. They like a sunny place, and rich, loose, moist soil. The Plume-flowered kinds need similar care, but the flowers are like pyramidal plumes.

Celosias, cristata, crimson	5	Celosias, Plume-flowered	
Purple, sulphur, each	5	rich crimson	5
Orange, rose, scarlet	5	Purple, rose, white, each	5
Chamois, copper, red	5	Violet, yellow, scarlet	5
Glasgow Prize, crimson	5	Triumph de l'Exposition, new French sort with splendid scarlet plumes	5
Giant Empress scarlet	5	Special mixture, 4 pkts.	3
Variiegata, Japan scarlet	5	10 cts., 1 pkt.	3
Special mixture, 4 pkts.		Above all Dwarfis.	
10 cts., 1 pkt.	3	10 cts., 1 pkt.	3

Complete mixture, both kinds, 4 pkts. 10 cts., 1 pkt. 3

New Giant Calendula.

Mixed colors, 4 packets 10 cts., 1 packet 3 cts.

A splendid annual with large, double flowers is the New Giant Calendula. Plants start quickly and bloom from early summer till the snows of winter, forming strong, compact, bushy plants, never troubled by insects, and always showy.

Primrose yellow	5	Yellow with gold stripes	5
Golden yellow	5	Sulphur and yellow	5
All varieties, special mixture, 4 pkts. 10 cts., 1 pkt.	3		
I can also supply C. pluvialis, the lovely single sort, and all of the older double-flowered varieties, same price.			
Calliopsis , the well-known Black-eyed Susan, red, brown, yellow, etc., double and single, mixed	3		

New Fragrant Centaureas.

Price, 4 packets 10 cts., 1 packet 3 cts.

One of the popular flowers recently introduced is Centaurea odorata. Plants start readily, soon come into bloom, and the flowers are large and showy, rich and varied in color, and always much admired.

Odorata celestina, light blue, exquisite	5
Chameleon, yellow and rose, lovely	5
Margarita, pure white, very chaste	5
Above varieties in mixture, 4 pkts. 10 cts., 1 pkt.	3
Cyanus, Single or Double, separate color or mixed	3
Americana, violet, and Sweet Sultan, yellow, each	3
New Dwarf, mixed, and Moschata, mixed, each	3
Complete mixture, all sorts, 4 pkts. 10 cts., 1 pkt.	3

Lovely New Hybrid Carnations.

11

Dianthus caryophyllus, early-blooming, 4 packets 10 cts., 1 packet 3 cts.

The lovely Pinks we have grouped under the head of New Hybrid Carnations are hardy perennials bearing exquisite, double, fragrant flowers the first season, when plants are started early. They appear in all the colors, from white to deep crimson, including yellow and striped and spotted. All are easily grown from seeds. The mixture I offer was specially prepared, and contains the sorts in fine proportion. If you select but half a dozen seed-packets from this GUIDE let one be Hybrid Carnations.

Improved Margaret, a new, finely scented, ever-blooming double Carnation, blooming the first season from seeds; splendid mixture, all colors..... 5
Margaret White, an early-blooming Pink with pure white double flowers, very sweet..... 5
Margaret yellow, a variety with yellow flowers..... 5
Margaret, Giant-flowered, an improved sort of the early-blooming Margaret Carnation; fine..... 10
Earliest French Chabaud, a new class almost rivaling the Margaret Carnations in earliness and quite as robust, while the flowers have the fine form and fragrance of the tree Carnations; splendid; mix'd 10
Guillaud Carnation, very early-blooming from seeds, producing mostly double flowers, many of which are of yellow shades, very fragrant, mixed..... 15
Early-flowering Vienna, exquisite fragrant flowers, 5
Grenadin, scarlet flowers, very double and fragrant... 5
New Cyclops Pink, a hybrid resembling the Japanese Pink in form and color, but having the fragrance of the Carnation; mixed..... 5
New Large-flowered Hybrid Border Carnation, very double, rich and varied in color, fragrant, mixed..... 5
All the above kinds in splendid mixture, 4 packets 10 cents, 1 packet..... 3

Showy Annual Chrysanthemums.

Fine mixed, 4 packets 10 cents, 1 packet 3 cents.

The Annual Chrysanthemums are very desirable showy flowers for the amateur, as the plants start easily from seeds, begin to bloom early and keep blooming till after frosts. Set 10 inches apart in a sunny bed. The new fringed variety is very handsome, and all are showy. The Dwarf Yellow is a novelty of merit.

Carinatum, rose and white, each.....	5	Coronarium white and Crimson, each..	5
Dark scarlet.....	3	Fringed, new, very fine.....	5
Burridgeanum.....	3	Dwarf yellow.....	5
Eclipse, variegated.....	3	Double white and yellow, each.....	5
Yellow and Purple each.....	5	Imbricatum fl. pl.....	5
Double white and double orange, each	5	Sulphureum fl. pl.....	5
The above sorts mixed.....	5	The above sorts, mixed.....	5
Complete mixture, of all sorts, 4 packets 10 cents, 1 packet.....	3		

New Early-Flowering Cosmos.

Mixed, 4 pkts. 10 cts., 1 pkt. 3 cts.

The Cosmos is one of the most beautiful and floriferous of the daisy-like flowers, very attractive, and useful for cutting. The plants have finely-cut foliage, and are exceedingly graceful. Sow in a sunny bed where the plants are to remain, about the time the apple is in bloom, thin and cultivate. Transplanting retards blooming sometimes till after frosts. Those I offer are early and large-flowered and will bloom in the most satisfactory manner.

Giant Early-flowering California Cosmos, pink.... 5
Crimson, rich shade..... 5
White, very fine..... 5
Special mixture, machine packed, 4 packets 10 cents, per packet..... 3

Mr. Park:—My wife invested in some seeds of your Early-flowering Cosmos last spring, and the plants are now in bloom. They are superb—the finest in the country.—T. A., Chs'n Co., S. C.

Callirhoe, trailing hardy perennials sometimes called Trailing Hollyhock; showy; finest mixed.... 3
Campanula, annual, white, rose and blue, mixed.... 3
Cannabis gigantea, giant ornamental Hemp, useful for foliage background..... 5
Carduus marianus, green foliage veined white..... 3

Candytuft, hardy annuals, fine for beds or cutting. Sow early, where plants are to bloom, and thin.
New Hyacinth-flowered, white, sweet-scented carnine, flesh color, lilac, purple, etc., each, 5 cts. per pkt., or in special mixture, 4 pkts. 10 cts., 1 pkt.... 3
Carthamus tinctorius (Saffron), annual, yellow..... 3

New Single and Double Dahlias.

Choice mixture, 4 packets 10 cents, 1 packet 3 cents.

Dahlias are as easily raised from seeds as Zinnias, and bloom almost as soon if well cared for. The large, rich, velvety flowers, both single and double, are showy in the garden, and excellent for table vases. The more desirable may be lifted in autumn and kept in the cellar for spring bedding. Sow early and transplant to a rich, moist, partially shaded bed, as you would Zinnias. The seeds I offer were saved, both single and double, by the best European growers, and can be depended upon for a fine display of flowers. 4 pkts. 10 cts., 1 pkt. 3 cts.

Improved Large-flowered Double, finest mixture, saved only from the best double, tall growing varieties.....	10
Improved Double Dwarf, finest mixture of the best dwarf varieties.....	10
Improved Double Lilliput, beautiful small-flowered sorts, showy in beds, fine for bouquets, mixed.....	10
Improved Single-flowered, variegated, margined, striped and spotted, fine mixture.....	6
Improved Single-flowered, extra fine mixed Complete mixture of all varieties, double and single, French and German, machine packed, 4 packets 10 cts., per pkt....	3

New Large-flowered Double Daisies.

Special mixture, 4 packets 10 cts., 1 packet 3 cts.

The Double Daisy is a modest little plant, but is hardy, blooms continuously and bears very pretty flowers. Fine for edgings and beds. Likes moist shade. Fine for winter-blooming in pots. The seeds I offer are first-class, and of the large-flowered varieties.

Large-flowered Crimson, showy, dark rose flowers, produced on strong, vigorous stems.....	5
Large-flowered White, superb large flowers, pure white, fine for cemetery planting.....	6
Special mixture of both varieties, finest quality, machine-packed, 4 packets 10 cents, 1 packet.....	3

Dwarf Convolvulus.

The Dwarf Morning Glory (Convolvulus) is a charming flower, brilliant and very attractive. Colors range from white to royal purple. One of our best annuals. Plants a foot high. Set ten inches apart. I have ten varieties I supply separately or in special mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

Capsicum , Ornamental Pepper, 25 fine sorts, fruits of various forms and rich colors; very fine, mixed.....	3
Catchfly London Pride, red and white, mixed.....	3
Centauridium , annual, yellow daisy-like bloom.....	3
Centranthus , lovely annuals, white, red and rose clusters, blooms well late in the season, mixed.....	3
Chamaepeuce diacantha, the Fish-bone Thistle.....	3
Cleome , annuals with spider-like flowers, mixed.....	3
Clarkia very pretty annuals, a foot high, bearing showy flowers, single and double, of various rich colors, 18 colors and sorts, mixed.....	3
Clintonia , lobelia-like plants, fine for vases, mixed.....	3
Collomia coccinea, fine scarlet-flowered annual.....	6
Commelyn , very beautiful but flaccid bloom throughout the season; somewhat resembles Tradescantia, seeds start readily, mixed.....	3
Cosmidium purple, coreopsis-like bloom.....	3
Crepis , annuals with aster-like flowers, mixed.....	3
Cuphea , Segar Flower; pretty, 3 colors, mixed.....	3
Cynoglossum , blue and white, mixed.....	3
Datura Wrightii, an annual, easily grown from seeds; bears through the season immense trumpet-like flowers five or six inches in length of a charming lavender, shading to white. The flowers open in the evening and remain open until closed by the sun next day. They emit a delightful odor. The roots are tuberous and may be kept like Dahlias for future use, 4 packets for 10 cents; per packet.....	3
Other Daturas.—Double—yellow, white, violet, lilac, separate or mixed, 4 packets 10 cents, one packet.....	3

Choice Delphiniums.

Complete mixture, 4 packets 10 cents, 1 packet 3 cents.

The Annual and Perennial Delphiniums (known as Larkspurs), are among the finest of our garden flowers. The flowers are produced laterally upon long stems, and are showy, rich in color, and beautiful. Seeds of the annuals may be sown in early autumn where the plants are to bloom, which will be in the spring; or, sow early in spring for summer and autumn blooming. The perennials are hardy, and will bloom for many years. My mixture of these fine plants is carefully prepared, and will be sure to please.

ANNUAL SORTS.

New Giant Hyacinth-flowered, dwarf, with huge hyacinth-like spikes. See engraving. I have 13 colors, and can supply them separately or in mixture. Price 4 pkts. 10c., 1 pkt.....	3
Tall Rocket, mixed.....	3
Pure white.....	3
Stock-flowered, mixed.....	3
Emperor, mixed.....	3
Candelabrum, tall, mixed.....	3
Annual sorts in mixture.....	3

PERENNIAL SORTS.

Nudicaule, scarlet.....	3
Cashmerianum, rich blue, large.....	3
Formosum, tall, rich blue, very showy.....	3
Elatum, Bee Larkspur, very large, fine.....	3
Double Hybrids, mixed.....	3
Zall, new giant yellow.....	3
Perennial sorts mixed.....	3
Complete mixture, annual and perennial, 4 pkts 10 cts., pkt.....	3

Large-flowered Japanese Dianthus.

Splendid mixture, 4 packets 10 cents, 1 packet 3 cents.

No garden is complete without a good collection of the finer Chinese and Japanese Dianthus or Indian Pinks. Seedling plants begin to bloom in a few weeks, and bloom till after frost. The flowers are both single and double, of fine form, rich in color, and very effective in the garden, as well as in bouquets. Many are strikingly variegated and striped. If not allowed to bear seeds the bloom is not only continuous, but the plants will live for years and bloom every season. The seeds I offer are unsurpassed, embracing all the bright new colors and varieties. 4 packets 10 cts., 1 packet 3 cts.

SINGLE-FLOWERED VARIETIES.

Queen of Holland, new, white.....	6
Crimson Belle, large, velvety dark red, beautiful	6
Salmon Queen, new; salmon-pink, fine.....	6
Eastern Queen, very large, single, rose.....	6
The Bride, very pretty, white with purple center.....	6
Snowflake, lovely fringed single white flowers, fine.....	6
Sanguineus, single, fringed, crimson.....	3
Special mixture of single sorts, 4 pkts. 10 cts., 1 pkt. ...	3

DOUBLE-FLOWERED VARIETIES.

Snowball, immense double flowers of exquisite form; pure white, tinted rose toward base of petals.....	5
Atropurpureus, rich blood red, large.....	5
Mourning Cloak, rich blood red, pure white margin, Diadematus, the Diadem Pink, very double, highly colored and richly marked.....	5
Purpureus fl. pl., purple fringed.....	5
Striatus fl. pl., new striped fringed flowers, rose, red and white.....	5
Special mixture of double sorts, 4 pkts. 10c., 1 pkt.....	3

DWARF DOUBLE JAPAN PINKS.

Cupreus-coccineus, fine coppery scarlet.....	5
Roseus, rosy pink, very fine.....	5
Dwarf Diadem Pink.....	5
Albus, white, large and handsome.....	5
Improved Double Imperial Pinks, dwarf, mixed colors	5
Dwarf, special mixture, 4 pkts. 10 cts. 1 pkt.....	3
Complete mixture of all sorts, 4 pkts. 10 cts., 1 pkt.....	3

Californica Eschscholtzias.

Special mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

The Eschscholtzia is a showy annual found native in the Golden State, California, where the flowers appear as fields of shining gold. There are few annuals brighter or more gaudy. The cultivated sorts show single and double flowers, and include many colors. Sow early, where the plants are to bloom. I offer a fine collection, and my special mixture embraces all of them.

Californica, yellow.....	3
Alba, white.....	3
Alba rosea, rosy.....	3
Aurantiaea, orange.....	3
Rose Cardinal, pink.....	3
Rosea fl. pl., double rose	3
Maritima, Golden West.....	3
Tenuifolia, cut-leaved.....	3
Complete mixture, 4 packets 10 cents, 1 packet	3

The Lovely Eutocas.

Those who admire only large, showy flowers should not get the Eutocas, but for humble and dear little flowers Eutocas can be recommended. *E. viscida* in blue and white is the best species, and makes handsome blooming borders; six to eight inches high. *E. Wrangeliana*, lilac, is very floriferous, but small.

Per packet 5 cts., or in complete special mixture, 4 packets 10 cts., 1 packet 3 cts.	
<i>Erysimum</i> , hardy annuals growing a foot high; Yellow and orange, each.....	3
Nanum compactum, new dwarf, very floriferous.....	3
Complete special mixture, 4 pkts. 10 cts., 1 pkt.....	3
<i>Eucharidium</i> , Californian annuals, with white, rose and red flowers; neat, free-blooming; mixed.....	3
<i>Eupatorium</i> Fraseri, two feet high; small white flowers, showy, good for cutting.....	3
<i>Euphorbia</i> variegata, Snow on the Mountain, Heterophylla, brilliant scarlet bracts, fine.....	3
<i>Fenzlia</i> dianthiflora, a pretty little hardy annual from California, exquisite pink bloom in masses. 3	3

Splendid Godetias.

The Godetias are annuals with attractive flowers, blooming very satisfactorily in a cool place. They are popular in England, and would be favorites in many places if better known. Flowers range from white to carmine. I offer the best sorts.

Brilliant carmine 5	
Bijou, pretty, rosy white	5
Duchess of Albany, white	5
Complete mixture of all sorts, 4 pkts. 10 cts., 1 pkt	3
<i>Gaillardia</i> picta, fine everblooming bedding plants. All sorts, special mixture, 4 pkts. 10c., pkt. 3	
<i>Gaura</i> Lindheimeri, two feet; rosy white bloom	3
<i>Gilia</i> , annuals, 1 foot high, with little cup-shaped flowers in profusion; many varieties, special mixture, 4 packets 10 cents, 1 packet.....	3
<i>Glaucium</i> , silver-leaved plant; flowers yellow.....	3
<i>Grammanthes</i> gentianoides, a charming little succulent annual; orange-red flowers in profusion	3

Marigolds in Great Variety.

Splendid mixture, 4 packets 10 cents, 1 packet 3 cents.

Old-fashioned, ever-blooming garden flowers of easy culture. Very showy in beds. The African sorts are erect, with large, zinnia-like flowers. The French varieties are more spreading, and have honey-comb flowers. The miniature are very dwarf, and have small flowers. The seeds I offer were saved from the finest flowers, and the mixtures are first-class.

CHOICE FRENCH MARIGOLDS.

Tall, orange, spotted, yellow, striped, sulphur and large-flowered, separate or mixed..... 3
Dwarf, orange, orange quilled, striped, sulphur, bicolor, French varieties, Tall and Dwarf, special mixture..... 3

NEW MINIATURE FRENCH MARIGOLDS.

Brown, gold-margined..... 5
Golden yellow and sulphur, each..... 3
The varieties in splendid mixture..... 3

CHOICE AFRICAN MARIGOLDS.

Tall, orange, orange quilled, sulphur quilled, Pallida, Eldorado, separate or mixed..... 3
Dwarf, orange, orange quilled, sulphur, sulphur quilled, separate or mixed..... 3
African varieties, Tall and Dwarf, special mixture..... 5
Legion of Honor, single, bright red and effective..... 5
Signata maculata, fine for edging or low, dense border; fern-like foliage, dense, delicate, deliciously scented..... 5

Complete mixture of all varieties, French, African and other sorts, 4 packets 10 cents, 1 packet..... 3

Sweet Mignonette in Variety.

Complete mixture, 4 pkts. 10 cts.. 1 pkt. 3 cts.

No garden is complete without a bed or a few clumps of Sweet Mignonette. The flowers appear well, yield a wealth of delicate perfume, and are fine for bouquets. Cut freely to promote free-blooming. The newer sorts are all contained in my mixture.

Pumila erecta, elegant dwarf sort, compact, very floriferous, exceedingly fragrant; fine for pots, or for a low edging or border; 4 packets 10 cents, 1 packet..... 3
Golden Queen, very large, yellow sprays, vigorous, 4 packets 10 cents, 1 packet..... 3
Victoria, red, showy and beautiful..... 3
Miles Spiral, compact, large, sweet..... 3
Matchet, fine variety for pots..... 3
Common Sweet, per ounce 10 cts.. 1 pkt. 3
Ruby, new coppery-scarlet flowers..... 5
Dwarf Victoria, new dwarf, red..... 5
Complete mixture, machine-packed, 4 packets 10 cents, 1 packet..... 3

Helianthus globosus multiflorus, a superb large, double Sunflower; 4 packets 10 cents, 1 packet..... 3
Complete special mixture, many sorts, 4 pkts 10c, pkt..... 3
Hibiscus Africanus, sulphur, with black eye..... 3
Humeana, a Mexican Poppy, two feet high yellow, handsome..... 3
Impatiens glandulifera, Balsam, annual, six feet high, with great clusters of handsome rosy bloom; popular in France as a border and summer hedge plant..... 3
Isotoma, fine annual for pots or edgings; blue and white, mixed..... 3
Jonopsidium, Diamond Flower, a miniature plant, fine for carpeting beds and pots..... 3
Larkspur (see Delphinium, p. 12), special mixture..... 3
Lavatera, annual of easy culture, flowers like a small Hollyhock, beautiful; 4 pkts. 10c, pkt..... 3
Laya elegans, a dwarf, compact annual; flowers yellow shading to white, pretty..... 3
Leptosiphon, beautiful and profuse-blooming annuals from California; rose, white, yellow, blue, etc., separate or mixed..... 3
Leptosyne maritima, handsome yellow-flowered annual..... 3
Stillmanii, a new sort, golden yellow..... 3

Beautiful Lobelias.

Complete mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

Lobelias are lovely plants for vases, pots, baskets or edgings, being of compact habit, very free-blooming, and remaining in bloom for months. Fine for winter blooming in a sunny window, when plants are started in mid-summer. I offer all the choice kinds separate or in mixture, 4 packets 10 cents, 1 packet 3 cents.
Blue, crimson, white, azure, etc., mixed..... 3
Cardinalis, large scarlet..... 3
Ramosa, tall, mixed..... 3
Complete mixture..... 3

Leucanthemum maximum, the Ox-eye Daisy..... 3
Limnanthes Douglasii, a prostrate, hardy annual; flowers yellow, shading to white..... 3
Linum grandiflorum, Scarlet Flax, showy and pretty garden plants, perennial South; mixed..... 3
Linaria, annuals and perennials; flowers pretty and in great profusion; mixed..... 3
Cymbalaria, Kenilworth Ivy, for baskets and for carpeting beds of bulbs and Roses..... 3
Lupinus, beautiful; 12 varieties, separate or mixed..... 3
Lycchnis, hardy perennials of great beauty; flowers of delicate texture and rich color; Haageana, Chalcedonia, Alpina, etc., each mixture, 4 pkts. 10c, pkt. 3
Complete mixture of all varieties; 4 pkts. 10c, 1 pkt. 3
Malva, annuals and perennials, some tall, others dwarf, very pretty; six sorts, separate or mixed..... 3
Malope, showy, white, rose and purple flowers, mxd..... 3
Martynia, delicate, graceful, gloxinia-like flowers, yellow, rose and red, spotted; separate or mixed..... 3
Matricaria, double, white; beautiful; mixed..... 3
Mathiola bicornis, sweet-scented Evening Stock..... 3

Lovely Mimulus.

Complete mixture, 4 pkts 10 cts., 1 pkt. 3 cts.

These are fine for vases or pots, in a moist, partial shade, blooming freely, and always exciting admiration.

Some have duplex flowers, as shown in the engraving. The tigered varieties are the most showy. My complete mixture contains seeds of all the kinds; 4 packets 10 cents, 1 packet 3 cents.

Tigrinus, Fire King..... 5
Albus, white-grounded..... 5
Albus, duplex..... 5
Albus red-spotted..... 5
Moschatus, Musk..... 5
Compactus, yellow..... 5
Maximus duplex..... 5

Special mixture, 4 packets 10 cents, one packet.....	3

Charming New Nemesias.

Superb mixture, 4 pkts. 10cts., 1 pkt. 3 cts.

Nemesias are beautiful little annuals, very profuse blooming, and useful for beds and edgings. The new compact sorts (see engraving) are especially fine, and *N. strumosa* is a novelty highly praised by European florists. The sorts separate or mixed, 4 pkts. 10c., 1 pkt. 3c.

Lovely Nemophilas.

Complete Mixture, 4 pkts. 10c., 1 pkt. 3c.

Everybody admires the flowers of *Nemophila*, and when seeds are sown on the north side of a picket fence or building, either in fall or spring, the display is charming. The flowers are large, delicate and attractive in color, often handsomely spotted. Hardy annuals of easy

culture. I have sixteen fine sorts, embracing all colors, which I offer at 5 cents per packet, or in complete mixture at 4 packets 10 cents, 1 packet 3 cents.

Nierembergia, very profuse-blooming, showy plants, useful for pots and beds; mixed sorts..... 3

New Nicotiana Sylvestris.

4 pkts. 10 cts., 1 pkt. 3 cts.

This is a splendid novelty. The seedlings begin to bloom when small, and produce great clusters of star-shaped tubular white flowers throughout the season. The flowers are as sweetly scented as an *Auratum* Lily. Every person should have a clump of *Nicotiana Sylvestris*. Price 4 pkts 10c. 1 pkt 3

OTHER VARIETIES.

<i>Acuminata</i> , white, sweet.....	3
<i>Atropurpurea grandiflora</i>	3
<i>Colossea</i> , giant.....	3
<i>Afinis</i> , sweet-scented.....	3
<i>Macrophylla gigantea</i>	3
<i>Tabaccum</i> , fol. var.....	3

Complete special mixture, all sorts, 4 pkts. 10 cts., pkt. 3

Nigella, hardy annuals, sown fall or spring; pretty blue and white flowers; mixed varieties..... 3

Nolana, prostrate, hardy annuals, suitable for rock-work, vases or baskets, mixed..... 3

Nycterinia, pretty half-hardy annuals, useful grown in masses, large clusters; very fragrant..... 3

Obediscaria, hardy perennials; flowers yellow with dark, cone-like centre; mixed..... 3

Enothera, the Evening Primrose, mostly hardy biennials, with showy, charming yellow flowers, opening in the evening. Some are tall, others dwarf. Seven best species, separate or mixed..... 3

Oxalis, valuable plants for pots and baskets; colors white, red and yellow; seven best sorts, or mixed..... 3

Oxyura, hardy annual, flowers aster-like, yellow..... 3

Roemer's Giant Prize Pansies.

Complete Mixture, per packet 3 cents, 4 packets 10 cents.

As yet nothing better has been developed in Pansies than the magnificent strain known as Roemer's Giant Prize Pansies, the result of the long-continued efforts of Mr. Frederick Roemer of Germany. In size the flowers of this splendid strain surpass anything yet known among Pansies, while the form, rich and odd colors and markings and sturdy and floriferous habit are all that can be desired. I offer this splendid strain as the *ne plus ultra* of Pansies, and that every person may be able to avail themselves of a few seeds I offer them at a popular price, and in mixed shades instead of mixed colors and varieties.

These superb mixtures are prepared under my personal supervision from the seeds of the various shades, and represent in fine proportion all the best creations in Pansies known. The seeds are of very high quality and very valuable, and should be sown carefully, with a view to having every seed grow. My collection of these Pansies embraces a wonderful variety, and I can supply any color or shade separately if desired, the price for such special packets being 10 cents each. All of the seeds I here offer come direct from the famous German specialist, Mr. Frederick Roemer, and are of his production. Certainly nothing better as Pansy seeds can be obtained in the world. Those who fail to get and sow a collection of these Pansies will miss an opportunity to produce and enjoy the grandest display of marvellous flowers to be found in any garden—something that will elicit unbounded praise and admiration from everyone.

Pansy plants are easily grown from seeds, which may be sown in spring, summer or autumn. They soon come into bloom, and make a showy and beautiful bed. Plants started in mid-summer begin to bloom in autumn, endure the winter, and rival the Tulips and Hyacinths in gorgeous display in early spring. Seeds require from ten days to two weeks to germinate, and should be

sown in boxes or in a sheltered bed, and transplanted about eight or ten inches apart each way in a partially shaded bed of deep, rich, moist soil. Their culture is simple, and every person who has a garden can succeed with them.

Only 25 cents for 10 packets of Roemer's Giant Prize Pansies—one packet of each of the following:

White in variety, embracing pure white, white with eye, white slightly shaded and tinted, white with spots, etc., 3 cents per packet, 4 packets 10 cents.

Red in variety, embracing bright red, rosy red, rich scarlet, and red with tints and shadings, etc., 3 cents per packet, 4 packets 10 cents.

Blue in variety, embracing dark blue, dark violet, rich purple, and blue margined and shaded and blotched, 3 cents per packet, 4 packets 10 cents.

Black in variety, embracing coal black, black blue, dark violet blue, jet black, purplish black, 3 cents per packet, 4 packets 10 cents.

Yellow in variety, embracing rich pure yellow, golden yellow, yellow with eye, yellow with spots, yellow shaded, etc., 3 cts. per packet, 4 packets 10 cts.

Striped and Flaked, embracing a great variety of colors, all distinctly striped, flaked and splashed, 3 cents per packet, 4 packets 10 cents.

Blotched and Spotted, embracing pure ground colors, with blotches and spots showing in peculiar and striking contrast; marvelous in size, form and odd markings. 3 cents per packet, 4 packets 10 cents.

Shaded and Margined, embracing all of the leading colors margined and shaded and rayed in superb and charming contrast; many light and beautiful tints as well as deeper and richer shades; 3 cts. per packet, 4 packets 10 cts.

Azure in variety, embracing lovely new shades of light blue, azure, ultramarine, and lavender blue, some strikingly marked and tinted, 3 cents per packet, 4 packets 10 cents.

Mixed colors, embracing a variety of superb shades and markings not included in above offerings, as plain and fancy faces of orange, bronze, peacock, lilac, violet, etc., many rare and exquisite varieties are represented in this mixture. 3 cts. per pkt., 4 pkts. 10 cts.

Complete mixture of Roemer's Giant Prize Pansies, embracing all of the shades and colors and markings, 3 cents per packet, 4 packets 10 cents.

All these Pansies are packed by our steam-power packing machines, otherwise could not be offered at the low prices named. The 10 choice mixtures for 25 cents is a great bargain, and should be secured by all who love and cultivate this popular flower.

Mr. Park:—I raised a double Pansy from some of your seed last year. All of my Pansies were very beautiful, but I could not understand why there should be any double ones among them.—Vena Mead, Franklin Co., Vt.

Mr. Park:—The Pansies came splendidly. If they bloom as good as they germinated we will have a lovely garden.—Mrs. Laura A. Best, Shelly Co., Iowa.

Mr. Park:—I have sent to all the leading florists for flower seeds, and find none so satisfactory as yours. Your seeds are always true to name, and germinate almost to a seed.—Mrs. Ethel Wilson, A. A. Co., Md.

Choice Single and Double Petunias.

Superb special mixture, machine-packed 4 pkts. 10 cents, 1 pkt. 3 cents.

One of the most desirable of cultivated flowers is the Petunia, and plants are easily grown from seeds. Started in spring they begin to bloom in June, and continue blooming freely till winter. As bedding plants, set 18 inches apart, they are very desirable, as the numerous, large, rich-colored, fragrant flowers are well displayed against the mass of foliage, and the plants endure the dry weather, and bloom where many other bedding plants would die. They also bloom beautifully in a sunny window in winter, the medium-flowered being more desirable for this purpose. My seeds of both single and double Mammoth Petunias are the finest that can be obtained, and will delight those who sow them.

FRINGED MAMMOTH-FLOWERED SINGLE PETUNIAS.

- Maculata, immense flowers, striped and blotched 10
- Titania, rich velvety purple, broad white band.... 10
- White, Brilliant Rose, Rosy-white, each..... 10

Complete mixture of all the above choice Double Petunias, finest quality, four packets 10 cents, per packet, 20 seeds 3

Double Rose-flowered Portulacas.

Complete special mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

A bed of Portulaca in full bloom on a bright summer morning is gorgeous and beautiful. The plants start easily, and from June till frost are a blaze of beauty every morning, unless allowed to become exhausted seeding. For the finest late flowers seeds should be sown in mid-summer. Sow where plants are to bloom or transplant, three or four inches apart. They like a sandy soil and sunny situation. My complete mixture is carefully prepared, and contains all the colors. Seeds offered are of the finest quality

| I can also supply single-flowered in separate colors or in mixture, at 4 packets for 10 cents, 1 packet..... 3 | | |

Large-flowered Phlox Drummondii.

Choice mixture, 4 packets 10 cents., 1 packet 3 cents.

The old fashioned Phlox Drummondii was a very handsome annual, but the improved large-flowered varieties far surpass it. The improvement has been continuous, and to-day, by careful culture and selection, the size and form of the flowers and the development of the clusters can hardly be excelled. The engraving shows a blooming cluster, but does not do it justice. In colors and markings and compact, floriferous habit the improvement is quite as great. For a garden bed, when well-grown these varieties are grand, and form a blaze of lovely color. The plants begin to bloom when young, and increase in beauty till checked by frost. Fine also for pots. The seeds I offer are very superior.

Phlox Drummondii, double-flowered, white, crimson, scarlet, yellow, red, etc., separate or mixed, 4 pkts 10c. pkt.	3
Hortensiflora, very profuse-blooming, mixed, 4 pkts 10 cts., 1 pkt.	3
Nana compacta, dwarf, mixed colors, 4 pkts 10 cts., 1 pkt.	3
Cuspidate and Fringed, all the leading colors and markings, 12 sorts, separate or mixed, 4 pkts 10 cts., 1 pkt.	3
Complete mixture of Large-flowered Cuspidate, Fringed, etc., 4 pkts 10 cts., 1 packet.	3

Choice Annual Poppies.

Comple mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

Every flower garden should contain a bed of the finer varieties of Poppies. When in bloom certainly nothing is more showy or beautiful. Sow the seeds in September, or in early spring, where the plants are to bloom, and thin till they stand eight inches or more apart. The seeds I offer are unsurpassed in quality, and my mixtures are all carefully prepared. Sure to please.

Pæony-flowered, very large, double flowers, showy as a Pæony, 12 colors, separate or mixed...	3	Rheas fl. pl. an elegant dwarf sort with fine double flowers; very fine for beds, splendid colors, mixed...	3
New Hybrid Cardinal, flowers appear as great feathery balls in gorgeous colors; very floriferous...	3	Shirley, a single-flowered kind of great beauty, selected from the Rheas Poppy...	3
Somniferum, double Opium Poppy; 12 colors, separate or mixed...	3	Carnation-flowered, mixed...	3
		Ten other leading kinds, separate...	3
Complete mixture of all varieties, machine-packed, 4 packets 10 cents, 1 packet...	3		

Fine Varieties of Ricinus.

Special mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

Among the finest of semi-tropical foliage plants we have the older varieties of Ricinus, as well as the varieties from Zanzibar. The older are, many of them, giant in form, and make a fine center for a foliage bed, while those of dwarf growth can be grouped around. Plant when the apple is in bloom, placing the seeds where you wish the plants to stand. A sunny place and a rich moist soil will produce enormous specimens. Borbontensis arborea a splendid variety, growing 15 feet high, thickly clothed with enormous graceful-shaped silvery leaves, and bearing a huge panicle of bloom at the top. 4 pkts 10 cts., 1 pkt. 3

Sanguineus, a beautiful species, 5 feet high; stalk, midrib of leaves and bloom-panicles shining red; very fine in contrast with the preceding sort. 4 pkts 10 cts., 1 pkt. 3

Gibsoni mirabilis, a dwarf, compact sort; both stalk and leaves dark red; fine for a foliage border. 4 pkts 10 cts., 1 pkt. 3

Zanzibariensis, a new rather dwarf sort with large leaves, handsome. Cinerascens, Enormis. Maculatus, Niger, Picturatus, Variabilis, separate or mixed, 4 pkts 10 cts., 1 pkt. 3

Palafortia , an annual, clusters of pink flowers.....	3	Physalis alkekengi, scarlet inflated calyxes.....	3
Palava flexuosa , mallow-like, rosy-purple flowers.....	3	Francheti (Chinese Lantern), new, large, red.....	3
Parsley , Double-curved Edging, a fine, dwarf foliage plant for edgings, also for culinary work.....	3	Podolepis , yellow autumn-flowering annuals.....	3
Perilla , annuals with crimped reddish foliage.....	3	Polygonum orientale, an old annual 10 feet high, with long, drooping racemes of carmine flowers.....	3
Phacelia , annuals with handsome blue flowers.....	3	New Variegated-leaved and New Dwarf each.....	3

Superb Double Ten Weeks' Stocks.

Complete mixture, all varieties, 4 packets 10 cents, 1 packet 3 cents.

Few persons are aware of the great beauty and usefulness of the superb double varieties of Ten Weeks' Stock. Hardly one desirable requisite of a first-class flowering annual can be named that they do not possess. Good habit, handsome foliage, free and continuous blooming, showy spikes of large, double flowers, rich and varied colors, delicious fragrance, easy culture and freedom from insects are all attributes of this grand annual. The plants are beautiful either in garden beds or pots in the house. Do not let the plants crowd in the seed box, and transplant with care, that they may not become stunted. Mulch the bed with stable litter as hot weather approaches. The seeds I offer were saved only from selected pot-plants by German specialists, and will produce a large percentage of perfectly double flowers. The mixture contains the finest colors well proportioned.

DWARF LARGE-FLOWERED VARIETIES.

This is one of the best varieties in cultivation. Plants grow one foot high and produce well-formed, fragrant flowers in great abundance.

Bright rose.....	8	Scarlet.....	5
Pure white.....	8	Aurora color.....	5

<i>Whittavia grandiflora</i> , a pretty annual, flowers bell-shaped, white or blue, separate or mixed.....	3

Cupreata, coppery red..	5	Carmine, fine carmine	5
Defiance, rich scarlet..	5	Viola, violet blue.....	5
Atrosanguinea, crimson	5	Stellata, starry center.	5

All varieties in special mixture, packed by our steam-power packers, 4 packets 10 cents, per packet..... 3

Verbena hybrida, Mammoth-flowered, all colors mixed, 4 packets 10 cents, per packet..... 3

All my Verbena seeds were carefully saved from the finest selected plants. There are none better to be had.

Compact Bedding Verbenas.

Special mixture, 4 pks. 10 cts., 1 pkt. 3 cts.

The New Hybrid Compact Bedding Verbenas are first-class ever-blooming plants, dwarf and compact in habit and very floriferous. The flowers are exquisite, deliciously scented, and borne in large, showy clusters throughout the season. They are the most desirable and beautiful of the improved Verbenas, and are unsurpassed either as bedding plants for summer, or pot plants in a sunny window in winter. All are easily grown from seed.

Rosea, fine, rosy pink.....	5	Coccinea, rich scarlet....	5
Viola oculata, blue.....	5	Stellata, red, with eye	5
with white eye.....	5	Candidissima, white.....	5

New Hybrid Sweet-scented Violas==Tufted Pansies.

Finest Strain—Special mixed, 4 packets 10 cents, 1 packet 3 cents.

For bedding these new, sweet-scented Violas are popular in Europe, and they are worth trying in this country. They are much like Pansies in appearance and need the same culture; free and continuous bloomers. Set plants six inches apart in a bed sloping north, or on the north side of a building or picket fence. I offer the choicest seeds in splendid mixture, 4 packets 10 cents, 1 packet 3 cents.

New Extra Early Wallflower.

4 packets 10 cents, 1 packet 3 cents.

The Wallflower is a general favorite wherever known, the spikes of bloom being graceful and showy, and the flowers deliciously scented. The plants thrive in any rich soil, in a sunny bed, and also do well in pots. The only objection to Wallflowers heretofore was that they required two years to become blooming plants. That objection is overcome in the New Parisian extra early ever-blooming golden-flowered sort here offered, which blooms almost as soon from seeds as the Early-flowering Ten Weeks' Stock, and is fine for autumn and winter flowers. I recommend this new Wallflower with confidence, and hope everyone who cultivates flowers either in house or in garden will give it a trial. 4 packets 10 cents, 1 packet 3 cents.

Mr. Park:—No flower-lover should neglect to give the New Extra Early Wallflower a trial. My plants have proved harder than Daisies, and bloomed freely. The odor of the flowers is sweetness itself.—J. G. A., Vancouver, B. C.

Mr. Park:—The single Wallflowers are the prettiest, and as sweet as Jasmine. The colors are rich, and the texture fine and velvety.—E. F. W., Iredel Co., N. C.

New Semi-Dwarf Double Zinnias.

Special mixture, 4 packets 10 cents, 1 packet 3 cents.

The Double Zinnia is one of the easiest grown and most desirable of all annual flowers. The plants start easily, begin to bloom early, and continue to bloom freely till frost. The new semi-dwarf sort I offer here is the best to use for a showy bed, as the plants form dwarf, compact bushes covered with large, rich-colored double bloom. Set plants a foot apart. All my Zinnia seeds were saved from selected plants, and will be found first-class in every respect.

Everlastings and Grasses.

These are mostly annuals with straw-like flowers that keep their form and color for years. With few exceptions they should be cut just as the buds begin to expand. Hang in the shade, stems upward, till dry. The grasses are fine for bouquets either green or dry.

Acroclinium, graceful and pretty half-hardy annuals; flowers nodding, an inch across, mostly rose and white, and for drying should be cut before expanding. Plants slender, with limulike foliage; 1 ft. high; pretty either in beds or pots.

Single rose.....	5	Double rose.....	5
Single white.....	5	Double white.....	5
All varieties, single and double, mixed.....	5		

Annobium alatum, new large-flowered; two feet high, robust, with handsome double white flowers; useful either in the garden or for winter bouquets; cut before the buds open..... 3

Gomphrena globosa, a very fine annual, very desirable as a bedding plant, making a gorgeous and continuous display. Colors white, carmine, flesh color and variegated. The new dwarf varieties are fine for pots. Cut when fully developed. Gomphrena aurea bears orange flowers. The colors, separate or mixed..... 5

Gypsophila, plants bearing beautiful panicles of miniature bloom, which are fine for bouquets. *G. muralis* is a floriferous edging plant, useful also for baskets or pots. *G. paniculata* is a hardy perennial with panicles of fairy-like white bloom, indispensable for cutting. Separate or mixed..... 5

Helipterum Sanfordii, grows a foot high, bearing clusters of golden bloom; fine for drying..... 5

Rhodanthé Mangelsii, bell-shaped, drooping and graceful flowers; colors white and rose..... 3

Helichrysium, New Double, showy, easily grown annuals for the border; fine for winter bouquets; cut before the buds expand; white, rose, crimson, and seven other colors, separate or mixed..... 5

Dwarf varieties mixed..... 5

Atrosanguineum, crimson, Minimum, mixed, each..... 5

Complete mixture, 4 packets 10 cts., per packet..... 3

Waltia grandiflora, a foot high, with branches terminating in numerous small yellow flowers..... 5

Xeranthemum annuum, a hardy annual, one foot high, bearing handsome, double flowers on long stems; colors mostly white, blue and purple; cut when fully developed. One of our best everlastings, and easily grown; separate or mixed.... 3

Mr. Park:—I have received plants, bulbs and seeds from you for the past eighteen years, and have never been disappointed—all good and reliable. I have had a great many beautiful flowers.—Mrs. A. G., Licking Co., O.

ORNAMENTAL CLIMBERS.

21

These constitute a very useful class of plants, as they may be trained to shade a window or porch, screen an unsightly building, or cover a trellis or summer-house. A collection of them should be found in every garden. Give support as soon as the plants begin to run.

Cobœa Scandens.

4 pkts. 10 cts., 1 pkt. 3 cts.

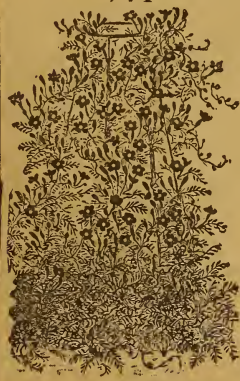

There are few vines more desirable than Cobœa scandens. Seeds planted edgewise soon germinate, and the plants grow rapidly, climbing from 20 to 30 feet high before the season is past, and showing a grand array of large, long-stemmed, graceful, nodding purple bells against a mass of lovely foliage. It climbs well at the south side of a building, and may also be used for covering a trellis or summer-house. Water sparingly till plants are well started. 4 pkts 10 cts., 1 pkt 3 cts.

Cobœa Macrostemma.

Cobœa Macrostemma is a new sort from the Canary Islands. Price, 3 pkts 25 cts., 1 pkt 10 cts.

Cypress Vine.

Price, 4 pkts. 10 cts., 1 pkt. 3 cts.

CYPRESS VINE.

This has the most graceful and beautiful dark green, feathery foliage of all the garden vines. For a neat trellis or ornamenting the trunks of young trees it is hardly excelled. The flowers are star-like, very rich in color, and stand out distinctly against the lovely foliage. The plants start readily from seeds, and grow from 10 to 12 feet high. Rose, white and scarlet, separate or mixed, 4 pkts 10 cts., 1 pkt 3 cts.

COBŒA SCANDENS.

The Hyacinth Bean.

4 packets 10 cts., one packet 3 cts.

The Dolichos lablab is a rapid-growing climber, known as Hyacinth Bean. It grows 15 feet, and produces bean-like flowers, white and purple in color, in fine clusters. These are succeeded by broad, deep purple beans, which are in themselves showy. Easily grown, and if seeds are not allowed to ripen will bloom all the season. Price, mixed colors, 4 pkts 10 cts., 1 pkt 3 cts.

Gourds and Cucumbers.

4 packets 10 cents, 1 packet 3 cents.

The Gourd family embraces a good variety of vines, free in growth, some delicate, some robust, and all useful. Many of them bear showy flowers, but as a rule the curiously shaped and colored fruits which succeed the flowers are more conspicuous than the bloom. The large-leaved, large-flowered and large-fruited sorts are especially valuable for covering old buildings or unsightly fences or walls, while the more delicate are fine for pillars, trellises and summer-houses. The small, fancy gourds are excellent toys for children, while the larger gourds may be used as dippers, sugar troughs, or bowls. The mixture I offer is specially prepared, and contains all the leading choice sorts. Do not omit it from your order. Price, 4 pkts 10 cts., 1 pkt 3 cts.

Giant Gourds, Yellow, Scarlet, Green, Grey and Orange, separate or special mixed..... 10
Abobra viridiflora, perennial..... 5
Angora, vigorous, spotted fruit..... 5
Bryonopsis laciniosa, pretty..... 5
Cyclanthera explodens, curious... 5

Cucumis, Snake Cucumber..... 5

Echinocystis, Wild Cucumber... 5
Lagenaria siphon, Dipper Gourd... 5
Longissima, Hercules Club..... 5
Ovata, Nest-Egg Gourd..... 5
Lagenaria, many sorts, mixed... 5

Luffa, mixed, Dish Cloth Gourds 5
Momordica, Balsam Apple..... 5
Melon, edible, climbing..... 5
Turk's Turban, mixed..... 5
Tricosanthes, Snake Gourd..... 5
Special mixture, many sorts, 4 pkts 10 cts., 1 pkt..... 3

Cardiospermum halicacabum, the balloon vine; very pretty foliage, and balloon-like seed vessels; a lovely vine for a low trellis. 3

Calampelis scabra, a half-hardy evergreen vine with racemes of scarlet flowers. Six to eight feet high. Start early. Very pretty trellis plant..... 3

New Japanese Hop Vine.

Price, 4 packets 10 cents, 1 packet 3 cents.

A beautiful foliage vine, vigorous in growth, dense and attractive, is the New Japanese Variegated Hop Vine, which starts quickly from seeds, and soon covers its support, growing to the height of 25 or 30 feet. The flowers are not conspicuous, but every leaf has an uneven surface, and is strikingly spotted and blotched with white and cream. You can hardly imagine how beautiful this vine is when well-grown. It is a variegated climber of high merit, and one that it is a pleasure to recommend. Sow the seeds where the plants are to stand, early in the spring. Does well on the south side of a wall or building, fully exposed to sun and air. It will climb a string or pole, and a few plants will make a dense and beautiful screen, admired by all who see it. Once grown it will propagate itself from volunteer seeds, and need not be sown every season. Price, first-class seeds, 4 packets 10 cents, 1 packet 3 cents.

Japanese Morning Glories.

Mixed, 4 pkts. 10 cts., 1 pkt. 3 cts.

Among the plants lately introduced these Morning Glories have proved worthy of high praise. They are species of *Ipomœa*, and have flowers as large as those of *I. limbata*, but representing a wonderful variety of colors and variegations, as carmine, rose, royal purple, azure, white, chocolate, velvety-red, some richly striped, blotched and spotted, some with colored throats, some distinctly margined and rayed. The plants are not as hardy as those of the common Morning Glory. Sow in a box early, and transplant to a warm, sunny place. My seeds are direct from Japan, and of very superior quality, containing all the colors and variegations, as well as double.

New Large-flowered Morning Glory.—This is the old-fashioned Morning Glory improved. It is yet the best, easiest grown, and most satisfactory annual vine for all purposes, and should not be discarded. I have white, rose, azure, carmine, red, striped, lilac, dark red, light blue, dark blue, black blue, Michaux's red, three colored, etc., separate or in splendid mixture. 4 packets 10 cts., 1 packet 3 cts.

Scarlet Hybrid Passion Vine.

Price, 4 pkts 10 cents, 1 packet 3 cents.

One of the most beautiful of the many vines I saw in the park at San Francisco, California, was a Passion Vine which covered the trees along a broad walk, forming a lovely green arch-way from which hung long, slender branches thickly set with the rosy-scarlet bloom, natural wreaths of lovely foliage and flowers. There the plant is a hardy, shrubby vine, and thrives and blooms every year without care. In a colder climate, however, it would require attention and protection. The seeds start readily, and the plants are of easy culture. This splendid Passion Vine, it is said, was introduced upon the Pacific coast by Spanish missionaries, who fancied the flowers typified the cross and crown. It is a first-class vine for the South, and may do well at the North, protected. This *Passiflora* is much handsomer than the native Southern species, the flowers being larger and more attractive. It will doubtless become very popular where the climate is not too severe. Price, 4 pkts 10 cts., 1 pkt 3 cts.

Centrosema grandiflora (Virginiana). A perennial vine, common in the South. Bears large, pea-shaped flowers, delicate in texture, and of a most exquisite lavender color. 3

Ipomœa. Very free-blooming and vigorous vines. 1. *coccinea* grows rapidly to a height of thirty feet, and bears a profusion of cypress-like flowers. 1. *limbata elegantissima* has very large, exquisite light blue flowers with distinct white margin. All are easily grown from seeds. My mixture is complete. 5

Coccinea, mixed colors..	3	<i>Nil grandiflora</i>	5
Hederacea, mixed colors	5	<i>Violacea vera</i>	5
Ieri, blue.....	5	<i>Alba, white</i>	5
<i>Limbata elegantissima</i> ..	5	Special mixture.....	5

Clitoria, a pea-like vine; rich and handsome flowers. Six feet high. Soak seeds before sowing.

Six colors, separate or mixed..... 3

Loasa lateritia, a handsome vine with stinging hairs, and attractive orange-red flowers; fine for a hedge; sow early and transplant to the garden..... 3

Lophospermum scandens, a beautiful climber, with hoary, graceful foliage, and large, maraudia-like pink flowers. Easily raised from seeds, which should be sown early to bloom in autumn. In winter the large, fleshy roots may be preserved in the cellar, or grown as a window trellis plant... 10

Coccinea, scarlet, fine..... 10
Special mixture..... 10

Park's Large-flowered Sweet Peas.

Complete mixture, per lb. 50 cts., one-fourth lb. 15 cts., one oz. 5 cts., per pkt. 3 cts., 4 pkts. 10 cts. Separate, mostly 10 cts. per ounce.

I make a specialty of Sweet Peas, and have about eighty of the choicest new and old varieties which are embraced in fine proportion in the complete mixture I offer. I can supply the varieties separately at 10 cents per oz., or 5 cents per packet. I also put up the improved large flowered sorts in mixed numbered packets, which I offer, 4 packets for 10 cents, or 3 cents per packet, or the entire lot, 10 packets, 25 cents. Here is the list:

No. 1, Shades of White. This packet includes all the new, chaste shades of white, as pearl white, pure white, cream white, flesh white.

No. 2, Shades of Red, includes bright red, carmine, scarlet and crimson, represented in many tints.

No. 3, Shades of Dark Blue, includes black blue, dark blue, violet and purple in many tints.

No. 4, Shades of Yellow, pure yellow, orange yellow, salmon yellow, cream-yellow, sulphur yellow. The colors are not well-defined, but the packet includes all the best yellow shades known.

No. 5, Shades of Light Blue, includes azure blue, lavender blue and sky blue in many tints.

No. 6, Shades of Bright Pink, includes brilliant rose, deep pink, carmine pink, and peach pink, with variations.

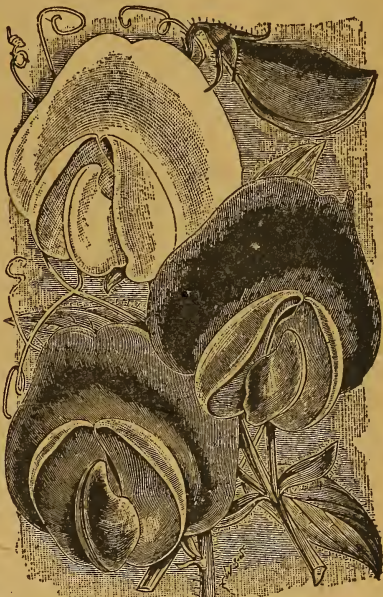

No. 7, Shaded and Margined, includes light colors of different shades, some flaked and margined with soft tints.

No. 8, Red Striped, blotched and variegated, a great variety of tints, the red colors predominating.

No. 9, Blue Striped, blotched and variegated, a great variety of tints, the blue color predominating.

No. 10, Double in Variety. The double character is not as yet well fixed, but this mixture includes all the varieties sold as double, and is of the best quality to be had.

I know of nothing that surpasses the Sweet Pea as an all around garden flower. It is as easily grown as a Vegetable Pea, makes a fine trellis or screen, blooms early and continuously throughout the season when cut freely, and the flowers are in clusters on long stems, of almost innumerable shades and markings, deliciously perfumed, and unequalled for bouquets, or for personal adornment. An ounce will sow fifty feet of row. My complete mixture of all varieties is unsurpassed by any mixture offered by others, being specially prepared under my own supervision from named varieties. I wish every patron could sow at least a quarter pound of these seeds, certainly no flower mixture could give them more pleasure.

Elegant Climbing Tropæolums.

Once 10 cts 4 pkts 10 cts 1 pkt. 3 cts.

The climbing Nasturtiums are old-fashioned, but they are everybody's flower, for everybody succeeds with them, either in house or garden, and the plants are always bright, clean and cheerful, and bloom freely and continuously, while the flowers are large, brilliant, varied in color, and delightfully fragrant. Indeed, they are "good enough to eat," and some persons do use them as a table decoration and as a salad, and find they exquisitely serve this double purpose. I have all of the known varieties, as white, yellow, crimson, scarlet, brown, rose, spotted, blotched, flaked and mottled, and my special mixture contains them all. Here are the varieties.

Atropurpureum, crimson	5	Pearl, whitish, very pretty.....	5
Coccineum, dazzling scarlet	5	Regellianum, purple, crimson	5
Dunett's Orange, bright orange...	5	Scheuerianum, straw color spotted	5
Edward Otto, rich bronze.....	5	Coccineum, scarlet, spotted.....	5
Hemisphericum, orange	5	Von Molke, bluish rose.....	5
Hunemann, brown, odd	5	Schilling, light yellow.....	5

Special mixture, machine packed, oz. 12 cts. 4 pkts. 10 cts. 1 pkt. 3 cts.

Tropæolum Peregrinum.—This is a lovely rapid-growing vine, useful for covering walls, windows or trellises; dense, elegant foliage and charming bird-like yellow flowers in wonderful profusion; easily grown. Price 3 cents per packet, 4 packets 10 cents.

Mina lobata. One of the finest for out-door culture. Growth vigorous, foliage beautiful and dense, flowers borne in great profusion. Start the seeds in a window box or hot-bed early in March. 5

Maurandya large-flowered, very beautiful climbing annuals for trellises or screens, the foliage dense and exceedingly graceful, and the tubular flowers abundantly produced, and very handsome. I have all the choice varieties and my mixture is specially prepared, 4 packets 10 cents, 1 packet.... 3

Scarlet Runner. A species of Bean growing as vigorously as a Morning Glory, and bearing large clusters of showy scarlet flowers. Easily grown. Bloom all summer if the seed pods are not allowed to form. 4 packets 10 cents, 1 packet..... 3

Thunbergia alata, a climber, attaining the height of six feet, producing lovely white, yellow and buff flowers throughout the season. An admirable vine. Six varieties separate, each packet 5 cts. Special mixture all sorts. 4 pkts. 10c., 1 pkt. 3

BIENNIALS AND PERENNIALS.

These mostly bloom the second season. The biennials die after blooming, but the perennials thrive and bloom for years. They are truly the "poor man's flowers," for most of them will take care of themselves and get finer as they grow older. The biennials often replenish the supply by self-seeding. A dollar expended in these seeds will generally yield more lasting pleasure and satisfaction than that amount expended for any other class of flowers. Be sure to start a bed of Biennials and Perennials this season. You will never regret it.

Carnations, Picotees and Pinks.

Complete Special mixture, machine packed, 4 pkts 10 cts., 1 pkt 3 cts.

I offer the finest collection of Carnations, Picotees and Pinks in cultivation, and hope every patron will get and sow at least a packet of the mixture. The seeds all start freely, and the plants are of easy culture. Sow in May or June and set plants eight inches apart. The plants thus treated will endure the winter and produce a grand display of sweet-scented bloom the next season. The flowers are mostly large and double, of all the rich shades from white to deep crimson, and many beautifully variegated. Fine for edgings or for beds or pots. Potted in autumn the Carnations will bloom freely in the house. No garden should lack a bed of these superb, fragrant flowers.

Carnation, finest double, for beds and borders, mixed	5	Pink, old-fashioned fringed, finest double, mixed.....	5
Grenadin fl. pl., compact, beautiful, mixed colors.....	5	Old-fashioned plain, finest double, mixed colors.....	5
Dwarf, early-flowering, fine double, mixed colors.....	5	Picotee Pink, from double show flowers, finest mixed	5
Perpetual-flowering, mixed	5	French Picotee, mixed.....	5
Extra Italian, double, from show flowers, mixed.....	5	Semperforens ruber, ever-blooming hardy Pink, new,	10
Margaret Carnation, mixed.....	5	a fine bedding and border plant.....	10
Ne Plus Ultra, finest double, mixed colors.....	10	Tree Carnations with yellow ground, double, fine.....	10
Splendid mixture, Carnations, Pinks and Picotees packed by steam-power, 4 pkts 10 cts., 1 pkt.....			

Canterbury Bells.

Special mixture, 4 pkts. 10 c., 1 pkt. 3c.

The Canterbury Bells are old hardy garden flowers, species of Campanula, that are exceedingly showy and beautiful. The seeds which I offer are of a greatly improved strain, and embrace single-flowered, double-flowered and the cup and saucer varieties, in all the known colors of the genus—pure white, dark blue, light blue, fine rose, and striped. These new kinds bloom for a long time, as the flowers develop successively, small buds, half-developed buds and full-blown flowers appearing upon the plants at the same time. Few flowers equal or surpass these magnificent varieties of Bellflower. The plants branch in tree-form, and every branch is thickly set with the large, graceful beautiful bells. A group or bed or hedge of improved Campanulas in full bloom is a glorious revelation to those who are unacquainted with these grand flowers. Easily grown from seeds; grow two feet high; set 15 inches apart. My seeds are from a German who makes a specialty of this flower, and my mixture contains all the varieties in fine proportion. The single-flowered are considered more graceful than the double. Special mixture of all the varieties, 4 packets 10 cts., 1 packet 3 cts.,

Canterbury Bell, single, white, rose, lilac, blue, striped, separate or mixed.	5
Canterbury Bell, double, white, rose, lilac, blue, striped, separate or mixed.	5
Canterbury Bell, cup and saucer (Calycanthemum) white, rose, blue, striped, separate or mixed.	5
Complete special mixture, all varieties, single, double, and cup and saucer, 4 packets 10 cents, 1 packet...	3

New Giant Perennial Gaillardias.

Choice mixture, 4 packets 10 cents., 1 packet 3 cents.

The Giant Gaillardias are first-class perennials. easily started, perfectly hardy, very free-blooming and exceedingly showy. The flowers are large, graceful, bright, gold and crimson color, often richly marked, and are fine for corsage or vases. For a hedge-row or for a group or bed on the lawn these Gaillardias are very desirable, as they bloom abundantly throughout the season. two feet high; set ten inches apart. Mixed varieties, 4 packets 10c., 1 packet 3c.

Gypsophila

Paniculata.

Price, 4 pkts. 10c. 1 pkt. 3c.

This is the most delicate and beautiful harmonizing flower imaginable. The fairy-like white bloom is borne in panicles upon almost invisible wiry stems, and when used with other flowers imparts a charm that can be had by no other combination. The plant grows two feet high, is hardy, blooms freely every year, and is almost indispensable where the best effect in cut flowers is desired. The engraving shows a vase of Gaillardias and Gypsophila in combination. Price, 4 packets 10 cents, 1 packet 3 cents.

Allegheny Hollyhocks.

Finest mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

The Allegheny Hollyhocks are highly praised by those who have grown them, and I offer a splendid mixture, hoping my patrons will try them. They are said to surpass Chater's Strain, the flowers being finely colored, very beautifully fringed, and perfectly double, as shown in the engraving. If the tops are cut off as soon as the flowers fade the plants will last for several years. Price, 4 packets 10 cents, 1 packet 3 cents.

Pure white.....	10	Isabel color.....	10	Rosy carmine.....	10

Perennial Cosmos--Pyrethrum.

Finest mixture, 4 packets 10 cents, 1 packet 3 cents.

Here is a perennial of great beauty which is as yet so rare as to be almost a novelty. It is *Pyrethrum roseum* hybridum, but can be appropriately called "Perennial Cosmos," for the foliage is feathery and of a rich green, while the flowers are shaped like those of *Cosmos*, and are as brilliantly colored, white, rose, scarlet, crimson etc., borne on long, handsome stems. Anyone can grow these plants from seeds, and when once established they will care for themselves and bloom year after year, the flowers appearing in mid-summer, before annual *Cosmos* plants are in bud. For a group or border this grand perennial is very desirable. It grows two feet high, is erect and strong in appearance, and its gaudy flowers are held well above the foliage in great abundance. Likes a sunny bed and a deep, rich, moist soil. Set the plants about eight inches apart. Started early the plants will bloom the first season. Beautiful as vase or corsage flowers.

Splendid Giant Sweet Williams.

Complete mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

Sweet Williams are old-fashioned flowers that recall the happy associations of childhood, and are therefore favorites, aside from their beauty as perennial garden plants. The improved large-flowered varieties are much finer than the older ones, and cover a much greater range of rich colors and shades. My collection of these flowers is fine, and my special mixture contains all of both double and single kinds.

CHOICE VARIETIES.

Nigrescens, very dark.....
Albus, white.....
Hunt's Perfection, finely margined.....
Dunnett's Crimson, very rich.....
Oculatus, distinct eye.....
Auricula-flowered, large white eye.....
Special mixture of choice single sorts.....

Mr. Park:—For twelve years your Floral Magazine seeds and bulbs have made an invalid's home pleasant. None are more reliable. Though I receive many floral catalogues and Magazines, Park's are my chosen favorites for practical information and cultural advice.—E. F. Eggleston, Alleghany Co., N. Y.

FOR THE WINDOW.

Many of our best flowering window plants are easily and quickly raised from seeds. I here offer a large assortment of the most desirable, and recommend the seeds as fresh and reliable. Gloxinias, Cinerarias, Cyclamen, Geraniums, Heliotropes, Kentishworth Ivy, Lantanas, Primroses, Smilax, Tropæolum, and others are of the easiest culture from seeds, and the method is much cheaper and more pleasurable than securing the plants by any other method. Look over the list, select what you wish and raise your window plants from seeds. You will be surprised at the vigor with which they will grow, and how soon many of them will bloom.

Giant Tuberous Begonias.

Complete Special Mixture, per packet 3 cents, 4 packets 10 cents.

The most showy and beautiful of all Begonias belong to the tuberous-rooted section. The flowers are often three or four inches in diameter, in fine clusters, and of all the finer colors and shades. The seeds are very small, but start readily sown uncovered in pressed furrows in sifted, packed soil, and kept moist, not wet. Beginners should not start with Begonias; but by those who have skill and some experience they are as easily grown as a Phlox or Pansy. I offer a fine assortment of seeds of the best European Strains, and my special mixture contains them all in fine proportion. Each packet contains 200 or more seeds. Price, 4 packets 10 cents, 1 packet 3 cents.

Bright Pink.....	15	Pure white.....	15	Bright carmine...	15	Bright rose.....	15
Complete Special mixture, all the above varieties, 4 pkts. 10 cts., 1 pkt. 3							

Choice Hybrid Calceolarias.

Finest mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

Among the most popular and beautiful of the greenhouse flowers grown from seeds are the choice Hybrid Calceolarias. The plants mostly grow a foot high, are bushy in form, and bear masses of superbly spotted flowers in clusters, the ground color white or flesh or gold, and the spots rich crimson and other dark colors, well defined. The seeds are fine, and require some skill to start successfully, and the plants must have due attention. When well grown, however, there are few plants more beautiful or more satisfactory. The seeds I offer are of the best known strain, and are first-class in every respect. My mixture contains seeds of all the finer and more beautiful varieties.

Double Winter-blooming Carnations.

Finest mixed, 4 pkts. 10 cts., 1 pkt. 3 cts.

For winter-blooming the splendid strain of Carnations I here offer is excellent. The plants are vigorous and very free-blooming, while the flowers are large and double, of all the fine shades of white, rose, scarlet and crimson, often finely striped and shaded. Sow in May and transplant to a sunny bed, setting eight inches apart. Early in September pot firmly in five-inch pots, water and shade till well established, then keep in a cool place, watered sparingly till in January, when a warm sunny window, and a copious supply of water will develop the masses of delicious bloom. Left in the open ground they will live and bloom the next season. Price, 4 packets 10 cents, 1 packet 3 cents.

Gorgeous Cineraria Grandiflora.

Prize strain, finest mixture, machine packed, 4 pkts 10 cts. 1 pkt 3 cts.

There is no flower in cultivation that makes a more gorgeous display in the window garden than the magnificent large-flowered strain of Hybrid Cinerarias I offer. The plants are of bushy, compact habit, and each one becomes a semi-globular mass of large, delicate, highly colored, richly variegated flowers. A window full of these glorious plants in full bloom elicits the enthusiastic admiration and praise of everyone who passes. The plants are easily raised from seeds, which should be sown in the hot-bed or window seed-box in April. Pot in three-inch pots when large enough, and shift as the plants advance, till they are in five-inch pots. Use good drainage and rich, light, porous soil. Syringe freely to keep off insects. If lice attack them sprinkle the foliage with insect powder or tobacco dust, and place tobacco dust or stems upon the pot under the foliage. Keep in a cool, airy place in summer. The seeds I offer were raised by a specialist of this splendid flower, and will produce the finest plants, and largest flowers in all the rich tints and variegations. Large-flowered Dwarf, finest mixture..... 10 Double-flowered, finest mixture..... 10 Large-flowered Cinerarias, complete mixture, prize strain, 4 pkts 10 cts., 1 pkt..... 3

New Fancy Coleus.

Complete mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

Coleus plants are as easily grown from seeds as an Amaranthus, and if the seeds are of a fine strain the foliage will be as brilliant and as finely marked as that of the fine named varieties. Often exceedingly handsome new varieties will reward the cultivator. Sow in a box in April or May, water sparingly, and avoid letting the seedlings chill. Set out after the soil becomes warm, on the north side of a picket fence, where the plants will be partially protected from the hot sun. The large-leaved plants are elegant for pots. The seeds I offer will produce plants of marvellous beauty.

New Giant-flowered Cyclamen.

Splendid mixture, 4 pkts, 10 cts., 1 pkt. 3 cts.

Any person can raise these fine Cyclamen from seeds. Almost every seed will germinate, and the young plants appear in about four weeks after sowing. Keep the plants constantly growing, and they will bloom in about 15 months after the seeds are sown. They are very free-blooming and beautiful pot plants for window decoration, and are easily cared for. Colors vary from white to dark carmine, and some are exquisitely tinted and shaded. The seeds I offer are the best to be obtained, and the plants will throw up masses of enormous flowers in all the bright and lovely colors. They are from an exhibition strain that has taken many first prizes. They are freely and confidently recommended. Special mixture, 4 pkts 10 cts., 1 pkt 3 cts.

Mr. Park:—In April, 1897, I sowed a packet of mixed Cyclamen seeds. In September, 1898, one began to blossom, and this January it had eight white blossoms at one time. A number of the plants have blossomed since. I find that the plants do best to remain in the first soil, without transplanting.—A. J. Hicok, Steuben Co., N.Y.

Magnificent Zonale Geraniums.

Finest mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

You can readily raise Geranium plants from seeds. They germinate in from one to four weeks after sowing, and the plants are robust in growth and come into bloom variously from eight to twelve months after they are started. There is much interest in watching the development of Zonale Geraniums from seeds. Some have beautiful zoned leaves, and the variously formed trusses of bloom, size of flowers, and diversity of shades all tend to afford pleasure in their culture. The seeds I offer are of the finest quality, saved only from the newer and finer varieties. They cannot fail to please those who try them. Finest mixture, 4 packets 10 cents, 1 packet 3 cents.

Mr. Park:—I wish you could see my Geraniums that I raised from one paper of seed that I got of you for three cents, I have 17 plants just ready to bloom. I do always have the best luck with the seeds I get of you.—Yours truly, Mrs. C. E. Anderson, La Porte Co., Indiana.

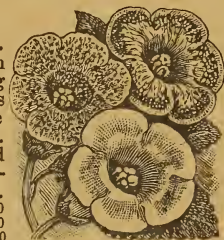

Superb Hybrid Gloxinias.

Special mixture, 4 packets 10 cents, 1 packet 3 cents.

Gloxinias are mostly raised from seeds, and begin to bloom in from six to eight months after the seeds are sown. The young plants are very small, and require some care, but aside from this they are as easily and successfully treated as a Begonia. Use sifted porous soil, firm well and sow in pressed rows, uncovered. Keep the soil constantly moist, but not wet. My seeds were saved only from the beautiful, large-flowered, exquisitely colored and variegated sorts, and can be depended upon to yield magnificent flowers.

New Bruant Heliotropes.

Special mixture, 4 packets 10 cents, 1 packet 3 cents.

I wish everyone would try raising Heliotropes from seeds. The plants start quickly, begin to bloom in summer, and bear masses of lovely, fragrant flowers. Seedlings are more healthy and vigorous than those propagated from cuttings, and the plants may be bedded out in a sunny place, where they will thrive and bloom finely. The new large-flowered kinds I offer were developed in Europe, and my seeds come direct from those who have given this superb flower special care. My mixture is carefully prepared, and contains all the fine new shades and colors. Complete mixture of all varieties, 4 packets 10 cents, 1 packet 3 cents.

The Beautiful Kenilworth Ivy.

Superb special mixture, 4 pkts. 10 cents, 1 pkt. 3 cents.

One of the most beautiful of basket or vase plants is Kenilworth Ivy (*Linaria Cymbalaria*), and it can be grown from seeds by anyone as readily as a Morning Glory. Seedling plants are of rapid growth, come into bloom in a few weeks, and make long, drooping sprays of exquisite foliage thickly set with lovely little flowers. The plant thrives in a cool, dense shade, and likes plenty of moisture about the roots. The plants are hardy perennials with protection at the north, and are excellent for carpeting a bed of Roses or Gladiolus. For a north window, or a window which the sun does not reach this lovely basket plant is just suited. It also does well in plant vases kept in a shaded place. The common sort has lilac-colored flowers, but I can supply the new white-flowered and the rose-flowered separately at 5 cents per packet. These rare and beautiful new varieties, however, are included in my special mixture, which is prepared with care, and offered at 4 packets 10 cts., 1 packet 3 cts.

Lantana, New Dwarf.

Finest mixed, 4 packets 10 cents, 1 packet 3 cents.

Lantanas grow well from seeds, but do not start as readily as some seeds—mostly requiring from four to six weeks to germinate. Seedlings are very thrifty, begin to bloom in autumn and produce the finest flowers. The plants are easily transplanted, and flourish in any rich soil in a sunny exposure. They like heat, and when plants are bedded out in the spring they bloom abundantly throughout the hottest months. The only objection to Lantanas for either house or garden has been their tall, loose growth. This can be overcome somewhat by severe pruning—cutting back the more vigorous branches to encourage a dense and bushy growth. The New Dwarf Lantanas I offer, are, however, naturally of dwarf and compact growth. They will be found a great improvement upon the older sorts, and a splendid acquisition to our list of window and garden flowers. Give them a trial. 4 packets 10 cents, 1 packet 3 cents.

Superb Fringed Chinese Primroses.

Finest mixture, 4 packets 10 cts., 1 packet 3 cts.

The Chinese Primrose in its numerous varieties, is generally acknowledged to be the best winter-blooming plant for the amateur's window. It grows from six to eight inches high, showing an abundance of graceful, beautiful foliage, surmounted by clusters of large, fringed flowers, delicate in texture, exquisite in form, rich and varied in color, and exceedingly showy. Easily started from seeds, which should be sown during the spring, to have blooming plants by winter. Sow in sifted, well-packed woods earth, with good drainage, and water rather sparingly. The little plants will appear in from two to four weeks, and should be potted off before they crowd each other. An even moderate moisture should be maintained. Plants often do better in tins cans than in earthen pots. They bloom in a rather cool room, and in either sun or shade. My seeds are unexcelled.

*Those marked with a star can be supplied with either Fern-leaves or Mallow-leaves. All are beautifully fringed.

A Lovely Vine--Boston Smilax.

31

Price, 4 pkts 10 cts.. 1 pkt. 3 cts.

For a window trellis, or for growing upon strings, there is nothing that surpasses the Boston Smilax. Even the unskilled cultivator can start the plants from seeds, and they are not liable to damp off, as many seedlings are, but grow on, sending up new shoots, each one more vigorous than its predecessors, until wreaths of vine from six to eight feet in length are displayed. The foliage is shining green, of firm texture, and when cut for decorative work will last in good condition for some days. Everybody who cultivates window plants should have a few pots of Boston Smilax. The plants are beautiful not only in foliage, but the clusters of white flowers are deliciously fragrant, and are succeeded by bright scarlet berries which appear well against the foliage. Price, 4 packets 10 cents, 1 packet 3 cents.

Mr. Park.—My Boston Smilax seeds began to come up inside of a week, and now I have eleven fine little vines, three to five inches high, which didn't mind transplanting in the least.—Mrs. J. A., Cook Co. Ill.

Large-flowered Torenias.

Superb mixture, 4 pkts. 10c., 1 pkt. 3c.

These Torenias are easily started and soon come into bloom, becoming bushy, globular plants eight or ten inches high, literally covered, with the lovely, richly-colored, snapdragon-like flowers. If you want something that will draw forth the highest expressions of praise from your friends get a packet of mixed seeds of the large-flowered Torenias. A few blooming pot plants of the different varieties well-grown are glorious, and the profusion of lavender, purple, white and rose flowers are a revelation to those who have never seen these superb plants in bloom. The varieties, separate, each 10 cents. All in splendid mixture, 4 packets 10 cents, per packet 3 cents.

Elegant Tropæolum Lobbianum.

Special mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

One of the most beautiful and desirable of vines for either the house or garden is Tropæolum Lobbianum. It is much like the common Nasturtium, but the flowers are of finer texture and produced in greater abundance. The foliage of this vine is clean and handsome, and the colors of the flowers range from sulphur to richest crimson as well as variegated. The plants do well in beds, making a fine display of foliage and bloom. They also grow very satisfactorily in pots or boxes in the window, and are very attractive in the window in winter. I can supply all the choice varieties, separate or in mixture. Price, 4 packets 10 cents, 1 packet 3 cents.

Grevillea--Australian Silk Oak.

Price, 3 packets 25 cents, 1 packet 10 cents.

Grevillea robusta, known as Australian Silk Oak, is a beautiful foliage pot plant, easily grown from seeds. Its leaves are compound, serrated and of graceful, fern-like form, and the plant ranks with the Palm for room decoration. Price 3 pkts. 25 cts., 1 pkt. 10 cts.

A Superb Hardy Plant--*Persicaria cuspidata*.

Price, 3 packets 25 cents, 1 packet 10 cents.

This is an elegant hardy herbaceous perennial. It grows eight feet high, forming gracefully curved branches of handsome foliage, and in autumn is white with the lovely racemes of bloom. When you get it started it will take care of itself and become an attractive and beautiful clump, eliciting the admiration of all who see it.

[NOTE.—For many years I have tried to get seeds of *Persicaria cuspidata* to offer my patrons, but this is the first season I have been able to secure even a small supply. I have a few ounces now, and will supply my friends, as long as the stock holds out, at three packets for 25 cents, one packet 10 cents.]

SEEDS OF HARDY SHRUBS AND VINES.

Many of our handsome shrubs are easily grown from seeds, but germination is not prompt—some lying dormant in the ground for a month or several months, or a year or two years before starting. Always reckon to give ample time for germination when sowing.

Centaurea crupina.	Gamolepis tagetes.	Liatria spicata.	Trollius Europæus.
Cephalaria tartarica.	Gardoula betonicoides.	Lunaria variegata.	Trifolium rubens.
Cerastium perfoliatum.	Gazanopsis stenophylla.	Lythrum Grafferi.	Suaevolens.
Chœnostoma polyantha.	Globularia tricosantha.	Manulea violacea.	Vicia Gerardii.
Cheiranthus annuus.			Vittadenia triloba.

The above list includes many choice flowers, though some are valuable for botanical study only. I offer a mixture which embraces nearly all of them, and those who will get a great variety of flowers, new and old. It is well worth the price asked for it—10 cents per packet. Do not forget to include "Mixture of Miscellaneous Seeds" in your order. Any of the above separately, 8 cents per packet.

POPULAR MIXTURES OF FLOWER SEEDS.

Mixture of Annuals.—Contains chiefly seeds of flowers blooming the first season. The mixture embraces over 100 genera, and the average would perhaps be five species and varieties to each genus, thus representing fully 500 kinds. Price 10 cents per packet.

Mixture of Biennials and Perennials.—Contains seeds of more than 50 genera, and represents perhaps 250 species and varieties. Price 10 cents.

Mixture of Seeds for the Window Garden.—Contains seeds of more than 25 genera, and represents perhaps 125 species and varieties. Price 10 cents.

Mixture of Climbers.—Contains seeds of a dozen different genera, about 50 varieties. Price 10 cents.

Mixture of Everlastings and Grasses.—Contains seeds of the leading flowers and grasses used for drying for winter bouquets. Price 10 cents.

NOTE.—These mixtures are carefully prepared, and every packet will yield a great variety of flowers, though perhaps not all that are represented in the general mixture. Before sowing separate the coarse seeds from the fine, as the latter should be surface-sown and the former covered. I highly recommend these mixtures.

Mixture of Fragrant Flowers.—Contains seeds of more than a dozen genera, representing about 50 kinds of our most fragrant flowers. Price 10 cents.

Mixture of Edging Plants.—Contains seeds of about a dozen genera of low-growing flowers, suitable for edging beds. There are 50 or more species and varieties represented in this mixture. Price 10 cents.

Mixture of White Flowers.—These are excellent where a moonlight display of flowers is desired. They are also suitable for graves. A good variety of species and varieties. Price 10 cents.

Mixture of Nearly All Varieties.—This is what we advertise—a mixture of 1000 varieties and colors. Price 10 cents per packet. Those who secure this packet will be surprised at the wonderful variety of flowers to be obtained therefrom.

CLOSING REMARKS.

DEAR READER:—In closing my descriptive and priced List of seeds I wish but to say that I have endeavored to give only truthful descriptions and honest illustrations. I have not attempted to induce sales by over praise. I would rather not have your orders than to get them by deception. As to prices, you will agree with me that they are low; while I assure you that the quality of the seeds is high. I do not handle cheap seeds. I offer only the best at the low prices quoted. My seeds of Asters, Balsams, Cannas, Carnations, Dianthus, Pansies, Petunias, Phloxes, Portulaca, Stocks, Verbenas, Zinnias, etc., cannot be surpassed in quality. The packets mostly contain enough seeds for the amateur's use. If more are wanted, four packets can be ordered. My seeds speak their own praise. All I ask is a fair trial. They will bear comparison with those of any seedsman, no matter what the price. Tell your friends of my establishment. Get up a club. Let me hear from you soon.

Florally Yours,

SEASON OF 1900.

GEO. W. PARK.

EVIDENCE OF QUALITY.

Mr. Park:—I must say that I am well pleased with the seeds and bulbs I received of you at different times. The Tuberosus Begonias were just grand. We have 22 bulbs in all the colors, and a large number of the flowers measured $4\frac{1}{2}$ inches across. Your Balsams were the largest and most double—just like Koses, and had a wonderful variety of colors. They took first prize at our fall show last year. We also received prizes for Zinnias, Snapdragons, Begonias and collection of annuals. Your Ten Weeks' Stocks are splendid this year. They have been in bloom ever since July 1st, and bear large spikes of beautiful flowers, in seven or eight colors. I intend to show them with the rest of the Cannas. We have thirteen colors of Verbena out of fourteen plants, and they cover a space of ground 8x16 feet. The bed is one mass of flowers of beautiful color.—C. H., Owen Sound, Canada.

TIME REQUIRED BY SEEDS TO GERMINATE.

The seeds I furnish are all fresh, and will certainly grow if fairly treated. Sow only a portion of each package at the first sowing, and allow ample time for germination. Study the following list to know when to expect the plants. Sow in one bed all the seeds germinating about the same time. Never condemn seeds without three different trials, and without allowing sufficient time for germination.

THREE TO FIVE DAYS.	CELENE	VERBASCUM	THUNBERGIA	HUNNEMANNIA	TWENTY TO THIRTY-FIVE DAYS.
Ageratum	Coleus	Veronica	Tropaeolum	Lantana	Adlumia
Ammobium	Cineraria	Vittadina	Valeriana	Maurandia	Baptisia australis
Atriplex	Corcepsis lanceolata	Wallflower	Verbena	Mandevilla	Berberis vulgaris

	Schizanthus	Potentilla		Primula sinensis	Musa
	Sycospermum	Pansy Viola		Veris	Rose
	Sweet William	Poinsettia		Rivinia humilis	Tradescantia
	Silene Schafra	Pentstemon		Smilax (Boston)	Viola odorata
	Petunia	Petudonia		Solanum robustum	
	Tradescantia	Hedbeckia			
	Tunica	Rocket			

[NOTE.—When sowing label the rows, and write also the month and day of month. Then by referring to the above table you can tell when to expect the plants. Sow the seeds which come up about the same time in contiguous rows, water well, then cover and keep covered till the plants appear. After the first watering water cautiously. Keep the soil moist, but not wet. Wet soil and poor ventilation will cause the seeds to rot or the plants to damp off. Shelter the young plants from hot sun, rain and wind or cold draughts of air, all of which will ruin them. Transplant as soon as large enough. They must not become crowded.]

PARK'S FLORAL ESTABLISHMENT.

FOUNDED IN 1869.

Supplies the choicest Seeds, Bulbs and Plants direct to the purchaser, by mail, express or freight at lowest prices for first-class stock. Enjoys a patronage of over half a million people, secured during a business course of more than a quarter of a century, by diligence, integrity and constant and faithful effort to have every sale satisfactory, and a bid for further trade.

The following publications are issued: Park's Floral Guide, offering Seeds and Bulbs; Park's Surprise List, offering Bulbs and Plants; Park's B'n List, offering hardy and winter-blooming Bulbs; Park's Floral Magazine, Illustrated, entirely floral, circulation 350,000 copies monthly. GEO. W. PARK, B. Sc., Editor. 25 cts. a year.

Address all communications to the proprietor.

GEO. W. PARK, Libonia, Franklin Co., Pa.

25 CENTS

sent for PARK'S FLORAL MAGAZINE for a year will entitle you to a premium of 25 cents worth of seeds which you may select from this Guide. If you get four of your friends to accept this offer, and send \$1.00, I will send your own seeds and Magazine free. Send for blank list and special terms and get up a large club. Address

SUMMER-BLOOMING BULBS.

PLANT OF TUBEROUS BEGONIA.

FLOWER AND PLANT OF TUBEROSE.

Achimenes, purple, lilac, violet, and other large-flowered sorts in fine mixture, doz. \$1.00, each 10 cts.

These are the finest and hardiest varieties of this lovely summer-blooming Gesneraceous plant. The bulbs are scale-like, plants easily grown, and always in bloom, the flowers being tubular, and very handsome; fine for pots and baskets. Pinch the top to promote branching.

Amaryllis atamasco, a small Amaryllis with pink flowers, per dozen 50 cents, each, 5 cents.

Johnsonii, a well-known pot plant with large, scarlet flowers, 35 cents.

Begonias, Giant Tuberous, white, scarlet, crimson, yellow and rose, each color, doz. 60 cts., each, 5 cts.

My bulbs of these magnificent flowers are of the finest strain, and will produce the finest plants and largest, brightest flowers. The bulbs were imported direct from Belgium, from a celebrated Begonia specialist, and can be depended upon. All are of large size, and will please those who receive them.

Caladium esculentum, large bulbs, per dozen \$1.50, each 15 cents; small bulbs, doz., 60 cts, each 5 cts.

Beautiful foliage plants, often known as Elephant Ear. The leaves are of enormous size, and the plants have an elegant appearance either as single specimens, or grouped together in a bed. Give a deep, rich soil and plenty of water while growing.

Calla, Little Gem, blooming-sized tubers, per dozen \$1.00, each 10 cents.

I have ordered a lot of these tubers from a Holland florist who has made this Calla a specialty, and expect them in April. Orders received early will be booked and the tubers sent as soon as received. The strain is highly recommended by the florist, and I hope to supply something better than is usually sold as Little Gem Calla.

Calla, spotted, (*Richardia maculata*) a species with spotted foliage and white flowers with purple throat. Per dozen \$1.00, each 10 cents.

Cannas, New Gladiolus-flowered, fine mixed sorts, brightest and best colors for bedding, per dozen \$1.50, each 15 cents.

Set a foot apart these make a glorious continuous-blooming bed of flowers. Give a sunny place and keep the soil moist.

Dicentra spectabilis, a hardy plant with long racemes of lovely heart-shaped pink flowers; per dozen \$1.50, each 15 cents.

Double Dahlias, fine named varieties in all the leading colors, per dozen, \$1.50, each, 15 cents.

There are few easier grown or more showy flowers than the Double Dahlias. The colors range from white to deep purple, with variegations. They bloom freely all summer.

Gesneria, plain-leaved and fancy-leaved, per dozen \$1.50; each 15 cents.

Rare and beautiful summer-blooming plants of various colors. I supply them only in two mixtures.

Hyacinthus candicans, blooming-sized bulbs, per dozen 50 cents, each 5 cents.

All of the above listed bulbs and tubers are first-class, although offered at low prices. I feel assured that those who favor me with their orders will be pleased. Later I shall issue my Surprise List of Choice Plants, shrubs, roots and tubers, quoting surprisingly low prices. Do not fail to send for it. Free. Address,

GEO. W. PARK, Seedsman and Florist, Libonia, Franklin Co., Pa.

Gladiolus, large bulbs, per hundred \$3.00, per dozen 40 cents, each 4 cents. Smaller, but blooming-sized bulbs, per hundred \$1.50, dozen 20 cts., each 3 cts.

Gladioli show a fine variety of colors, and set five inches deep and six inches apart make a very showy bed. If plants of Kenilworth Ivy are set a foot apart in the Gladiolus bed it will have a satisfactory and pleasing effect.

Gloxinias, Beautiful Hybrids, red, blue, white, and spotted, each color, per dozen \$1.00, each tuber 10 cents.

These are glorious flowers, elegant in foliage and producing the richest and handsomest flowers imaginable. I supply large tubers of the finest known strain, such as I can freely recommend. Pot in five-inch pots of rich, porous, well-drained soil, water regularly, and keep in partial shade. In potting, as with Tuberous Begonias, let the crown protrude above the soil.

Lilium auratum, the famous gold-rayed Japan Lily, large selected bulbs, per dozen \$2.50, each 25 cents; fine blooming-sized bulbs, per dozen \$1.50; each 15 cents.

This is a gorgeous Lily, creamy white and shell-pink, with a broad gold ray through the center of each segment, and raised spots of crimson and chocolate. The flower is of enormous size, and emits a deliciously sweet perfume. The bulb is hardy, and should be set eight inches deep in a well-drained soil. The spring is the best time to get the bulbs. The bulbs I supply are of a fine strain, many showing pink tints and a tendency to produce double flowers.

Madeira Vine, per dozen 50 cents, each 5 cents.

This is a magnificent, rapid-growing tuberous vine. The foliage is dense, succulent, and of a beautiful shining green. The creamy, deliciously scented flowers appear in racemes in wonderful profusion in autumn. The plant will grow in sun or shade, attaining the height of 20 feet, and completely cover a trellis or summer house. Set a foot apart, train upon cords.

Montbretia crocosmiiflora, a handsome summer bulb. Treat as Gladiolus; per doz. 50 cents, each 5c.

Nagelias, fine mixed, per dozen \$1.50; each 15 cts.

Gesneraceous plants, large, spreading and very free blooming. A fine summer pot plant for the window garden. Not well known, and mostly a novelty.

Paeonia, Chinese, hardy, white, rose, red, yellow-shaded, per dozen \$1.50, each 15 cents.

Tigridia conchiflora, yellow; **grandiflora alba**, white; **Pavonia**, red. Price, per dozen 50 cents, each 5c.

Tuberose, Double, and Excelsior Pearl, large bulbs, per dozen 35 cents, each 4 cents; smaller bulbs, but blooming-size, per dozen 25 cents, each 3 cents.

My Tuberose bulbs are southern grown, well preserved, and sure to bloom. They will be found reliable.

Tydas, choice sorts mixed, per dozen \$1.50, each 15c.

Very fine, rich-colored Gesneraceous plants of easy culture. Pinch central shoot to promote branching.

Water Lilies, white, large-flowered, fragrant, per dozen \$2.00, each 20 cents.
